

# Accidents don't have timetables

- but you can actively prepare to meet or avoid them

**MAERSK**  
TRAINING

a better **learning** experience

# When safety is priority number one

Maersk Training welcomes you to our state-of-the-art training facilities, and you can be certain of a better learning experience for your employees.

## Realistic safety training

We focus on the maritime, oil & gas and wind industries, delivering the learning that ensures the safety of employees in the target

industries. Furthermore, we focus on the technical knowhow necessary in order to perform the training at the required level of competence.

At Maersk Training we provide a perfect environment for efficient and realistic training, where your employees will meet the elements face to face for supreme training.

### Cost-effective

We aim to make it as cost-effective as possible for our customers by providing a “one-stop shop” with courses placed back to back. This ensures that the participants are ready to work with all valid certificates, when they have completed our efficient training programmes.

### Qualified instructors

We are proud of having a well-qualified, motivated and service-minded team of instructors who always focus on our customers’ needs.

### Maersk Training’s centres around the world

- Esbjerg, Denmark
- Svendborg, Denmark
- Stavanger, Norway
- Aberdeen, UK
- Newcastle, UK
- Chennai, India
- Port Harcourt, Nigeria
- Rio de Janeiro, Brazil

### Maersk Training’s specialist areas

- Maritime
- Oil & Gas
- Wind
- Survival
- Safety
- Security
- People Skills
- Crane Operations
- HR Services

---

This brochure concentrates on our main areas in Esbjerg, which are maritime, oil & gas and wind.

### Certificates

As the first training establishment to be awarded a DNV Certificate of Excellence, we now have branches in Newcastle and Aberdeen in Britain, Stavanger in Norway, Nigeria, Brazil and India as well as in Esbjerg and at the headquarters in Svendborg, Denmark.

Most of our courses are internationally accredited by the following organizations: The Danish Maritime Authority, OPITO, The Danish Energy Agency and IASST.

### Measuring knowledge

Several statistics and scientific researches show a strong correlation between providing proper training and a reduction in accidents and injuries. The purpose of the statutory training is to make sure that everyone has a minimum level of competency in common.

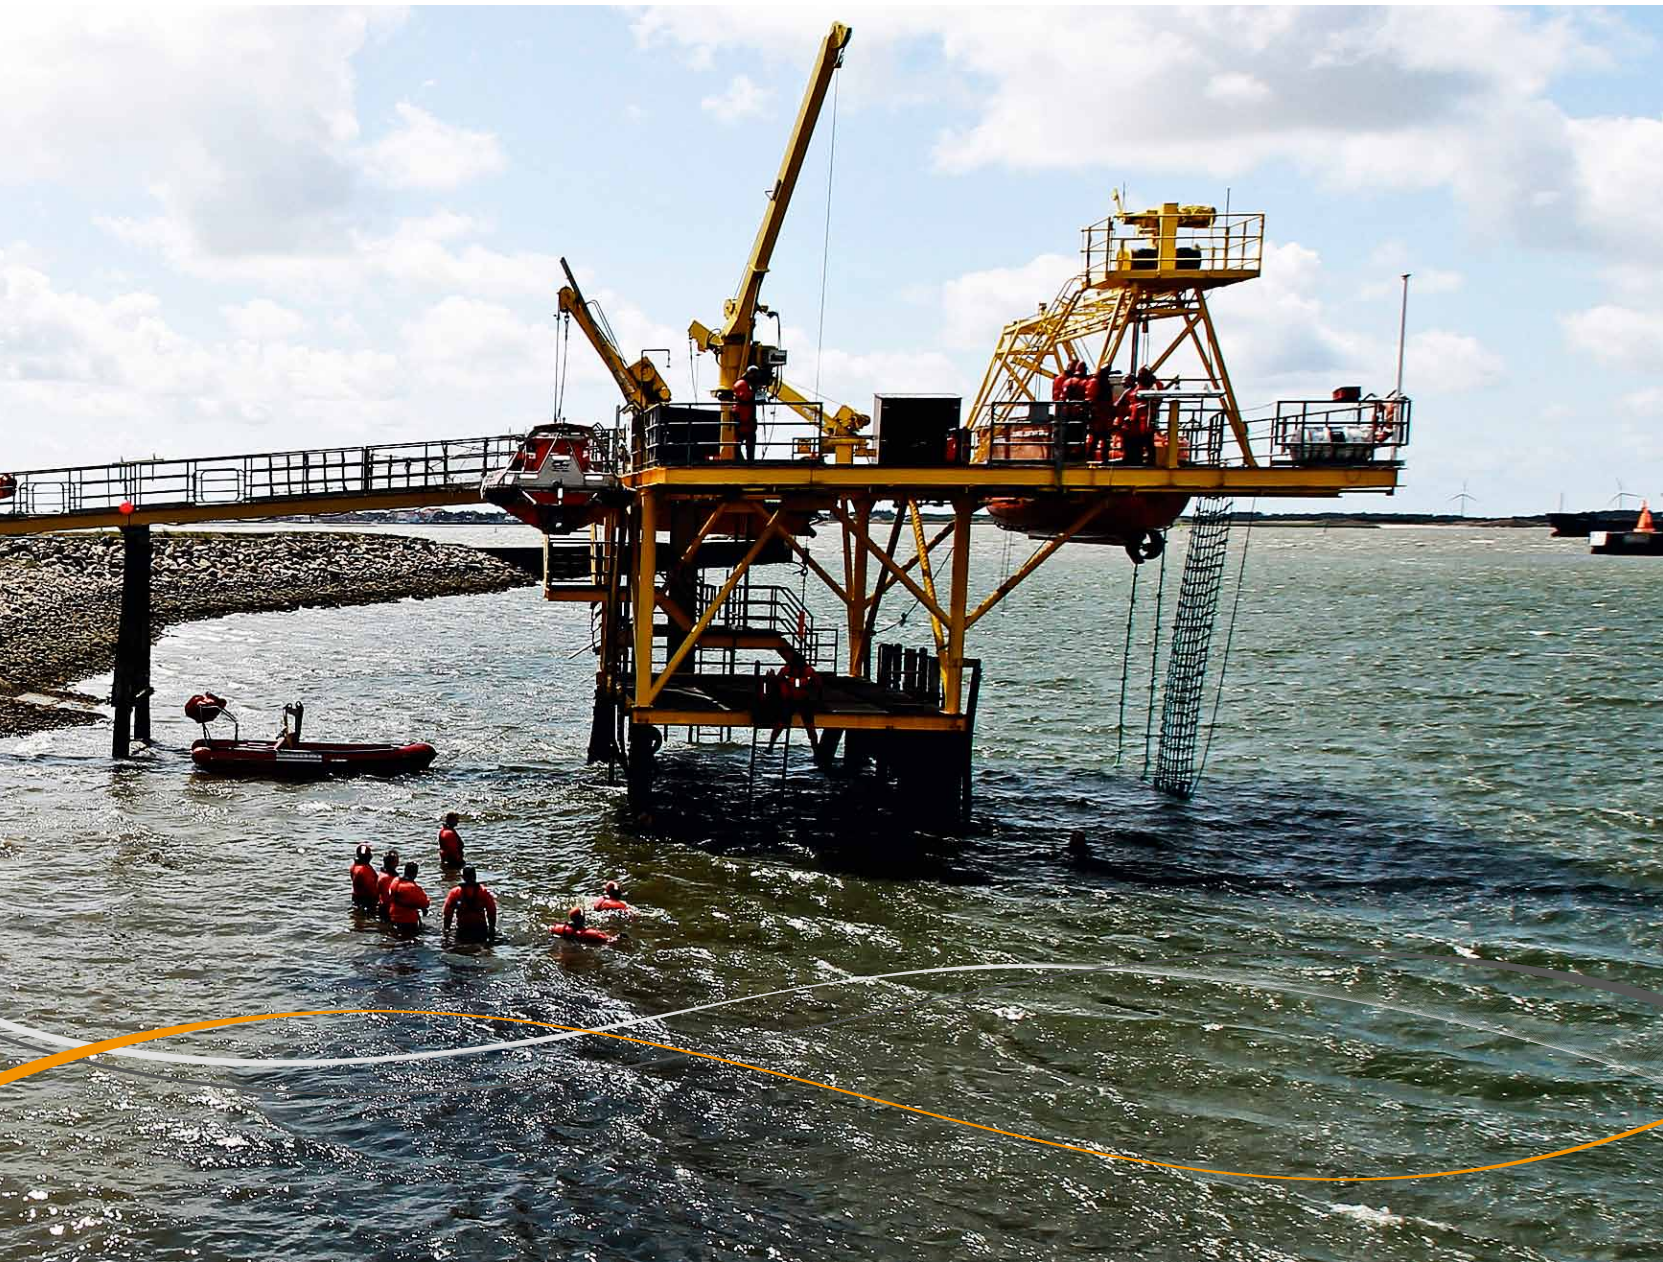

### Maritime

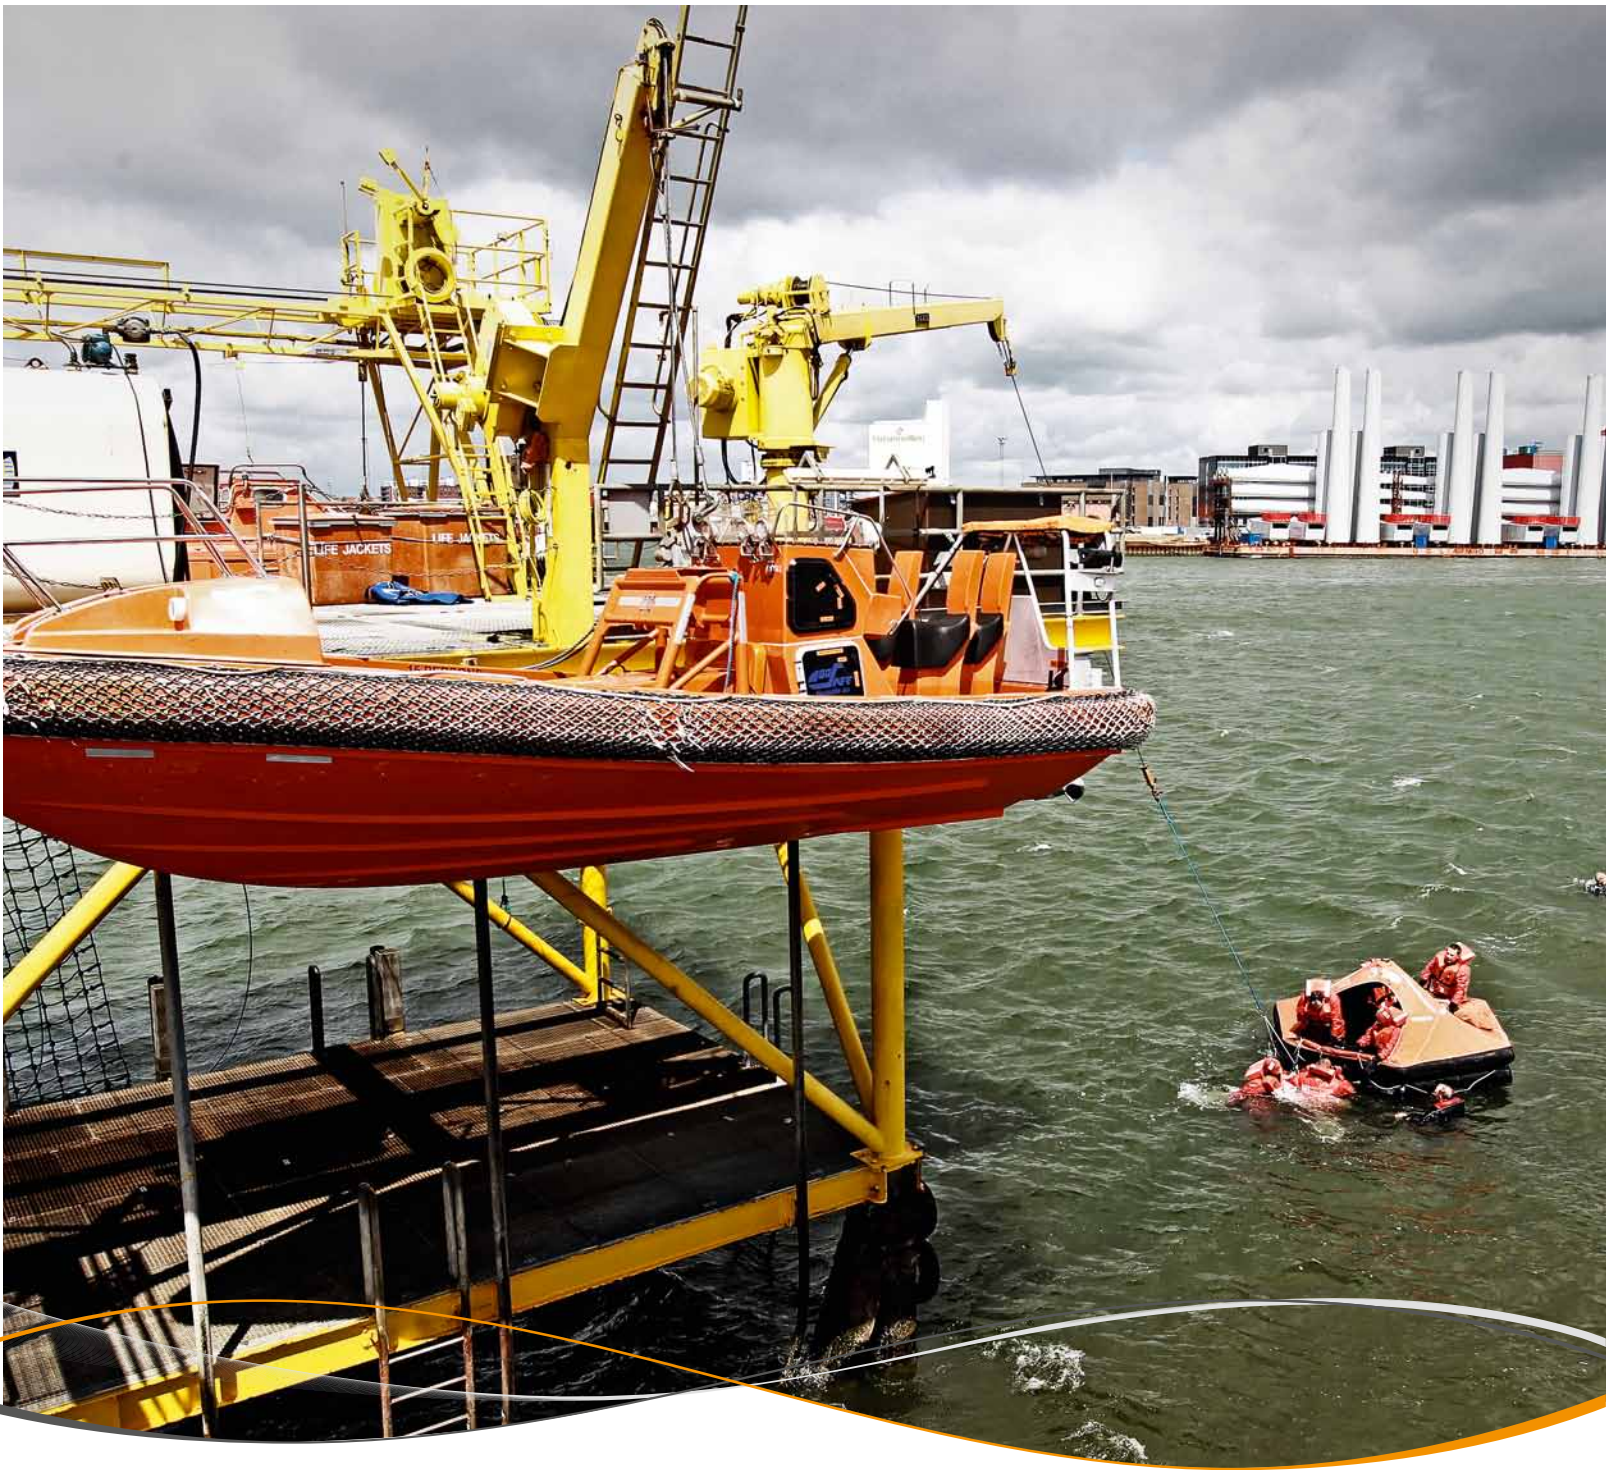

What we do in the maritime department is to aim higher by challenging the course participants in their zone of proximal development. We not only measure the course participants' knowledge improvement during the course, but are also able to support the customers with tools to measure and maintain the training acquired by having exercises in a real sea survival environment at "Stardos", our training platform, situated in the port of Esbjerg.

### Customized maritime training:

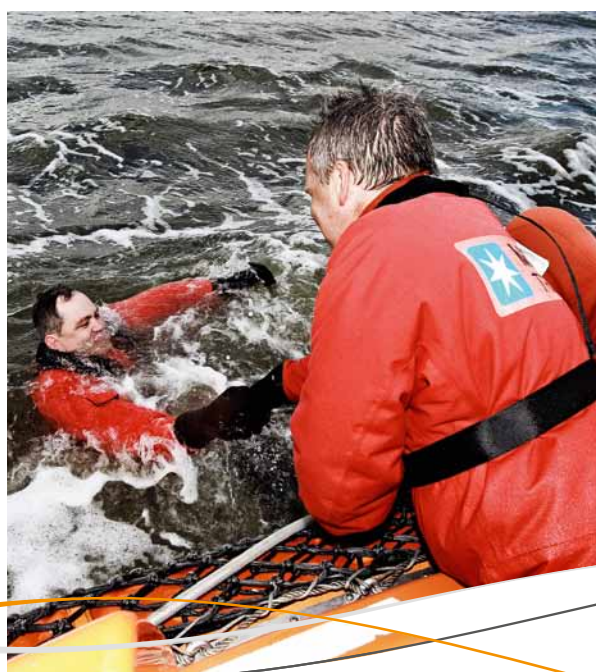

- MOB Boat Coxswain (MOB)
- Life Boat Coxswain
- Fast Rescue Boat (FRB)
- Daugther Craft Coxswain
- Boat Transfer
- ERRV, STCW & OPITO training

### Oil & Gas

We offer world-leading safety training targeting the oil & gas industry.

At our training facilities, experienced and qualified professionals help our customers prepare for emergency situations and prevent accidents by taking safety seriously.

### Customized safety training

We believe that safety should always have the highest priority when working in extreme conditions. And therefore we consider safety training a way of life – literally speaking.

Based on many years of experience and expertise within the offshore industry, we are able to offer customized safety training, courses and programmes.

### Types of training

The training is a combination of classroom instruction, practical, onboard and virtual 3D training. Our instructors are all craftsmen with extensive practical experience within their fields and our portfolio of courses is developed in accordance with relevant industry standards.

### Customized Oil & Gas safety training:

- Basic Safety Training
- Advanced Safety Training
- Helicopter Underwater Evacuation Training (HUET)
- Sea Survival Training
- Helicopter Landing Officer (HLO)
- H2S/Confined Spaces
- Basic and Extended Firefighting
- First Aid

## Wind

Maersk Training wind faculty delivers safety courses required by the different stakeholders within the wind industry. This is supplemented by technical training for several stakeholders.

Maersk Training is proud to hold various course accreditations from some of the most influential companies in the field.

We offer basic courses for new employees as well as refresher courses approved by a very large part of the industry.

## Training when needed

We plan our courses around the principle of “just-in-time training” meaning that we deliver the training for our customers when they need it. The different courses are back to back in one session, and we make sure that your employees are ready to go on site when required.

## On site training

On larger sites we offer on site training in order to minimize time wasted on bad weather and save the customer outlay from sending employees on courses in their free time.

If we cannot deliver in Esbjerg we offer the entire training package through one of our other centres. These include courses required for working in the UK.

## Customized wind safety training:

- STCW Sea Survival
- First Aid
- Basic Firefighting 4 hours
- Basic Harness (Siemens approved)
- Basic High Rescue and Evacuation
- Level 2 (Siemens approved)
- Level 3 (Siemens approved)
- Vestas Basic Offshore Course
- Confined Spaces
- Boat Transfer
- L-AUS
- HUET
- Manual Handling
- First Aid at Work (UK)
- CCSNG (UK)

ESVAGT owns and operates 32 vessels performing emergency rescue & recovery duties, oil spill response and many other service & support duties within the offshore oil & gas and wind turbine industry.

[www.esvagt.dk](http://www.esvagt.dk)

### Offshore & Maritime

Steel structures for life-saving equipment, rescue-training equipment...

### Recycling

Forged or casted shafts, pump houses and fly wheels, complete machined...

### Steel Construction

Design and calculations, "turn-key" projects, adapted containers, balustrades and balconies...

### Agriculture

Pump parts, chain wheels and complete machinery to the agriculture segment...

### Woodwork & Furniture Industry

Wooden toys, furniture frames and decorative art crafts...

## Outsourcing – Done right

At Global Outsourcing we help companies in all aspects of outsourcing, from the initial choice and handling of subcontractors to project management, quality control and logistics. With our wide network of qualified partners, we offer a broad range of outsourcing opportunities, including supply of products in a variety of materials, casted elements, welded structures, machined parts and much more.

We put great effort in creating and maintaining long-term relationships with our customers and partners. With know-how and experience, we ensure that our outsourcing partners deliver high-quality products on time and at the right price. By offering outsourcing to several countries worldwide, such as Poland, Slovakia, Russia and China, we are confident that we can also help your company on the way to success.
