

ANDRITZ

ANDRITZ Feed & Biofuel in Denmark

FEEDING & FUELING THE PLANET

The Partner for Sustainable Feed & Biofuel Production

ANDRITZ Feed & Biofuel, a division of the ANDRITZ Group, stands as our customers' comprehensive partner in the world of animal feed, aqua feed, pet food, and biofuel production. We understand that our customers' needs are unique, which is why we offer a wide spectrum of equipment and fully integrated plant solutions tailored to their specific requirements.

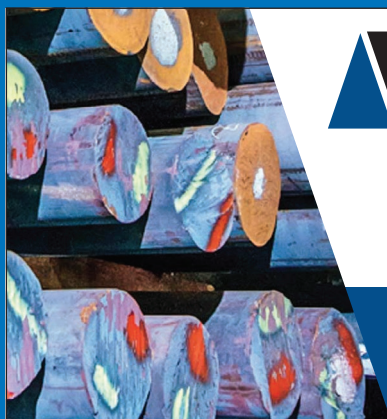

Whether a brand-new greenfield project should be started or an existing factory should be enhanced, our expertise is available to guide every step of the way.

Our over 185-year legacy is a testament to our unwavering commitment to excellence and innovation.

We leverage our deep industry knowledge and experience to ensure that our customers receive the highest quality products and services, all while optimizing the total cost of ownership. From initial concept to ongoing support, our customers can count on us for reliable service and unwavering dedication to their success.

ANDRITZ

Korinth Rørfabrik A/S

Korinth Rørfabrik A/S boasts over a century of experience in the development and production of pipes and special components for extraction systems and ventilation.

As a subcontractor, we manufacture ventilation systems for industries such as animal feed production and the wood industry. Korinth Rørfabrik A/S manufactures pipes and special components in steel, stainless steel, galvanized steel, aluminium, and more for process extraction ventilation systems as well as pipe components for downpipe systems and pneumatic systems.

We can deliver exactly what our customers request in the following materials:

- Galvanized steel
- Aluminium
- Stainless steel
- Zinc
- Black steel
- Copper

We implement all relevant small-scale metal work such as carving, rolling, bending, and welding.

Products

Pipes, bends, wear-resistant bends, transition pieces, manifolds, control dampers, false air dampers, pipe hangers, flanges, clamping rings, mufflers, jet caps, cyclones, silos, containers, and ducts.

Fiber laser cutting

We have invested in an HSG 6 KW fiber laser cutter, which is capable of cutting up to 27 mm thickness with great precision and speed, resulting in further enhancement of our production's quality.

We are capable of more than you might think – call us for a great offer!
