

Honest Quality

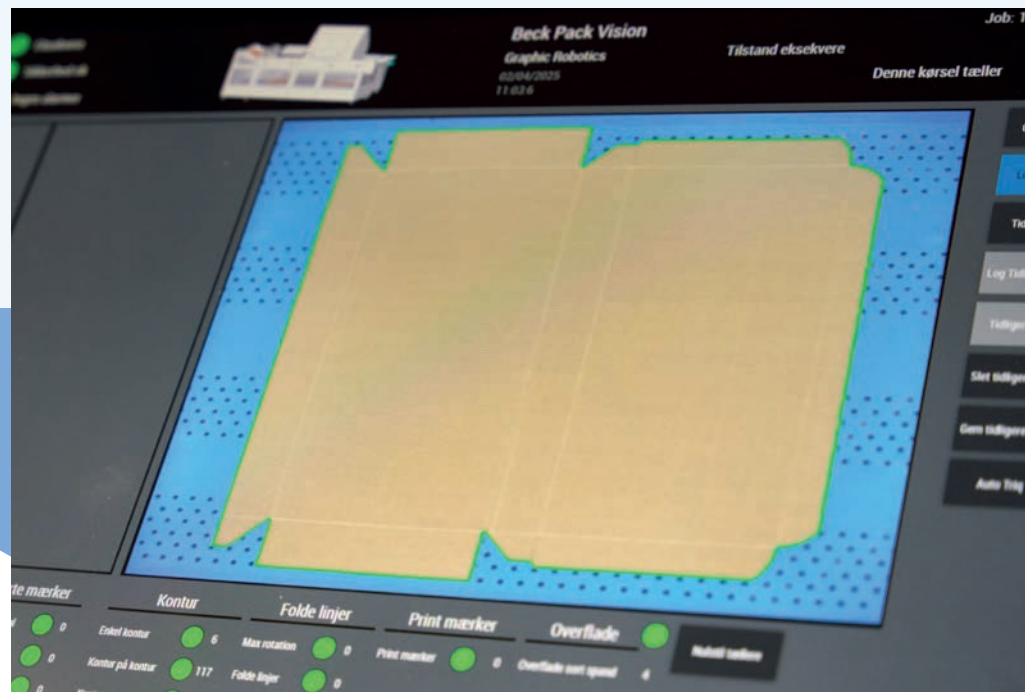

Welcome to Beck Pack Systems

Danish Expertise with Global Reach – 50 Years of Innovation and Sustainability

Beck Pack Systems is a globally recognized company with deep roots in Denmark and over 50 years of experience in packaging solutions for the frozen food industry. We strive to deliver the highest quality in everything we do and take pride in being a market leader in our field. Our core values – quality, loyalty, and innovation – are deeply embedded in our work and in our relationships with customers and partners.

Since 2017, we have been committed to leading the way in sustainability within our industry. We are dedicated to the UN's Sustainable Development Goal 12 on responsible consumption and production and continuously work to minimize our environmental footprint. Our goal is to create solutions that not only meet our customers' needs but also contribute to a more sustainable future.

From Local Craftsmanship to Global Impact

It all started with a vision to create better packaging solutions for the frozen food industry. Today, we are a global leader, but our foundation remains the same: high ambitions, innovative solutions, and a dedication to quality. We take pride in being part of an industry where details make the difference – and where our products not only meet the highest standards but also create real value for our customers.

Every day, we work closely with food producers worldwide to ensure that our packaging solutions not only meet but exceed expectations. We are driven by a passion for continuous improvement and for finding new ways to make packaging more efficient, sustainable, and user-friendly. Our employees are passionate experts who bring both experience and fresh thinking into everything we do.

Beck Liner® – Packaging with Care

Our flagship product, Beck Liner®, is designed to protect food in the most effective and sustainable way. Made from 100% recycled FSC-certified fibers, Beck Liner® provides a reliable solution that reduces waste and supports responsible consumption.

We understand that the frozen food industry faces increasing demands for both quality and environmental responsibility, and Beck Liner® is our response to this challenge. The product is designed to create perfect frozen blocks of fish, poultry, and vegetables – without air pockets or water accumulation. This means the food retains its freshness and quality for longer while enabling producers to optimize their production processes.

Why Choose Beck Liner®?

- **Sustainable Innovation:** Biodegradable and made from recycled materials
- **Optimal Protection:** Creates a complete oxygen barrier, preventing freezer burn
- **Everyday Efficiency:** Easy to pack, peel off, and use in production processes

At Beck Pack Systems, we don't just think about packaging today – we think about its role in the future of sustainable frozen food production. That's why we continuously develop new methods to reduce CO2 emissions and increase the recyclability of our products.

Strong Products Created Through Loyal Partnerships

At Beck Pack Systems, we believe that the best solutions arise from strong and long-term relationships. Our collaboration with loyal partners is the foundation of the quality and precision we stand for. When working closely together for decades, we learn each other's requirements, standards, and values down to the smallest detail – and that makes a difference.

"Our long-standing partnership with Beck Pack Systems is built on trust, quality, and innovation. Through close collaboration, we develop solutions like Beck Frames, Beck Ejectors, and Beck Trolley, ensuring efficiency and precision in the food industry. We look forward to continuing our partnership and creating the solutions of the future together."

Jesper Krog Sørensen
CEO, Maskinfabrikken Hillerslev

A Partnership Rooted in Quality and Innovation

One of the most significant partnerships in our history is with Maskinfabrikken Hillerslev. For over 40 years, we have worked side by side to develop innovative and durable solutions for the frozen food industry. Hillerslev has been a key supplier of high-quality components, delivering a wide range of solutions tailored to our needs. Among their many contributions, three standout products play a central role in Beck's portfolio: Beck Frames, Beck Ejectors, and Beck Trolley.

This partnership is built on mutual understanding, precision, and a shared passion for creating the best products for our customers. Hillerslev knows our needs inside out, and they understand that compromise is not an option when it comes to quality. That is why, year after year, we can deliver products that optimize our customers' production and ensure stable and efficient handling of frozen food.

Beck Frames – Stability and Precision in the Freezing Process

Beck Frames are an essential part of the frozen food industry, ensuring a stable and uniform freezing process. Made from high-quality aluminum, they optimize temperature transfer and reduce freezing time.

Specifications:

- Made from premium aluminum for optimal durability
- Available in three profiles (U, E, and XU) for different production methods
- XU profile ensures correct stacking and minimizes errors on conveyor belts

Beck Ejectors – Efficient and Gentle Release of Frozen Food Blocks

Beck Ejectors are designed for the quick and safe release of frozen food blocks from freezing frames without damaging the contents. It is a reliable and user-friendly solution that increases efficiency in the production line.

Specifications:

- Stainless steel for long lifespan and easy cleaning
- Handles 6–8 blocks per minute for optimal production speed
- Requires 6–7 bar air pressure for precise and gentle release

Beck Trolley – Safe Transport and Storage

Beck Trolley is designed for the safe handling and transport of Beck Freezing Frames and frozen food blocks. With a robust and ergonomic construction, it ensures easy handling and high hygiene standards.

Specifications:

- Made from stainless steel with durable nylon wheels
- Two swivel wheels with Stop-Fix brakes for optimal stability
- Available as single or double trolley with a capacity of up to 56 Beck Freezing Frames

Functional and Durable Products

Our products are designed to make life easier for food producers. From Beck Frames, which ensure uniform frozen blocks, to Beck Ejectors, which optimize workflow in production – we develop solutions that are built to last and perform at their best.

We understand that food production is a complex process where every element must function optimally. That is why our products are developed not only with functionality in mind but also with ease of use and durability as top priorities. We continuously test and improve our solutions to ensure they meet the highest standards and make a real difference in our customers' daily operations.

Our Promises to You:

- Sustainable and innovative packaging solutions
- Partnerships built on trust and quality
- Continuous development and improvement

At Beck Pack Systems, we don't just think about packaging – we think about the future. Let's create a world where functionality, quality, and sustainability come together.
