## QUALITY-ASSURED TANK TRANSPORTATION

Dantra Group is a family-owned tank transportation company founded in 1920 and currently managed by Kenneth Jensen, representing the fourth consecutive generation. Based on sound values, and with a constant focus on innovation and development, Dantra Group is a pioneering company within the transport sector for tank transport.

Dantra Group specialises in transportation of liquid raw materials and semi-finished products to and from technical, chemical and pharmaceutical companies in Europe. The fleet comprises over 250 units, making Dantra Group one of Scandinavia's leading tank-transportation companies.

With its special quality control system and a unique master-driver system, Dantra Group focuses on quality control, the environment, safety, documentation, traceability and product knowledge.

Ever since 1995, Dantra Group has been certified in accordance with ISO 9001, and since 2009 in accordance with ISO 14001. It also has SQAS and GMP+ certification, as well as ADR certification for transportation of hazardous goods.

Based in Hjøllund, Dantra Group covers both Scandinavia and much of the rest of Europe and – of course – all of Denmark. In addition to its head office in Hjøllund, Dantra Group also has local branches in Køge and Padborg, as well as in Sweden and Lithuania.

At Dantra Group, we focus on maintaining safe driving patterns and stable quality. The high quality is no coincidence, but the result of our dedicated efforts – every single day.

### DANTRA'S VALUES

- QUALITY
- PARTNERSHIP
- EMPLOYEES

## TRANSPORTATION OF TECHNICAL PRODUCTS, PHARMACEUTICAL PRODUCTS AND FOODSTUFFS

Dantra Group specialises in transportation of technical products, distributing pharmaceutical products and foodstuffs within Scandinavia and Europe.

At Dantra Group, all drivers receive special training and instruction in haulage of the various product types. This ensures a high level of product knowledge and insight, which we consider crucial to specialisation in this particular area. We take quality management seriously; our ISO 9001 and ISO 14001 certification guarantees the ultimate in quality and safety; and we also have SQAS and GMP+ certification.

We are able to operate insulated and non-insulated stainless tankers, technical transportation, ADR transportation and temperature-controlled transportation. Foodstuffs are always transported using GMP+ approved tankers with special approval for transportation of foodstuffs.

Dantra Group also offers transportation of pharmaceutical products in a dedicated set-up. All our vehicles are equipped with either a compressor or a pump.

At Dantra Group, all equipment and haulage is registered in the company, and our transportation can be traced back at least five years. This means we can always say from where and to where we have driven, and can always document precisely which product was in the tank during transportation.

After each transport both the tanks and the hoses are thoroughly cleaned. Each tank is then sealed, and a cleaning certificate is issued as a guarantee that the tank is both biologically and chemically clean and ready for the next transportation. Our tank-cleaning station in Hjøllund is certified in accordance with ISO 9001 and ISO 14001, as well as SQAS and EFTCO.

The customer group comprises both national and international producers of pharmaceutical products and foodstuffs.

***“THE HIGH QUALITY IS NO COINCIDENCE, BUT THE RESULT OF OUR DEDICATED EFFORTS – EVERY SINGLE DAY.”***

# TRANSPORTATION OF PETROL

Petrol and diesel truck.

## AND DIESEL

Dantra Group specialises in transportation of petrol and diesel distribution within Scandinavia.

The equipment for this transportation is extremely specialised, and Dantra Group operates tankers with pumps, rolled hoses, gauges and all the requisite technical equipment to guarantee safe delivery of petrol and diesel straight to filling stations. Safety and the environment are special focus areas for this type of transportation.

For weight reasons we use special aluminium tankers for our haulage, so we can operate efficiently, transporting the maximum possible volumes.

The drivers in this field receive special training and instruction in driving with such products. At Dantra Group we have scheduled training, e.g. in energy-efficient driving and firefighting. All drivers also receive ongoing first-aid training, which is mandatory for all drivers employed by Dantra Group.

We also have ISO 9001 and ISO 14001 certification for this type of transportation, and are furthermore SQAS certified.

The customer groups are national and international oil companies, as well as energy companies.

***"DANTRA GROUP SPECIALISES IN TRANSPORTATION OF PETROL AND DIESEL DISTRIBUTION WITHIN SCANDINAVIA. THE DRIVERS IN THIS FIELD RECEIVE SPECIAL TRAINING AND INSTRUCTION IN DRIVING WITH SUCH PRODUCTS."***

## TRANSPORTATION OF ADR GOODS AND CHEMICAL PRODUCTS

Dantra Group handles and distributes large quantities of dangerous goods (ADR) every day. We constantly focus on personal and environmental safety throughout the transportation cycle, and always comply with all the rules, guidelines and ADR-treaty provisions in this field.

Our drivers are specially trained for this particular type of driving, and all are updated with the latest knowledge in the field. As well as attending the set courses in firefighting, energy-efficient driving and first aid, the drivers are also specially trained in handling chemical products.

The drivers of course wear special protective equipment during loading and unloading. It is the shipper's responsibility that the goods be labelled correctly with ADR labels and that all relevant documents be included, and our transport and customerservice department is naturally always ready to provide advice and guidance.

This type of transportation uses special equipment: stainless-steel tanks and coated tanks. This means we can carry special products, e.g. various highly corrosive acidic and basic products. All our vehicles are furthermore equipped with either a compressor or a pump.

The customer group for this type of transportation includes producers and distributors of technical and chemical products throughout Europe.

***"THIS TYPE OF TRANSPORTATION USES SPECIAL EQUIPMENT: STAINLESS-STEEL TANKS AND COATED TANKS."***

## MASTER-DRIVER SYSTEM

At Dantra Group, we are proud to have developed a special system for the ongoing training of our drivers – a system that has also been an inspiration for our colleagues within the industry. In brief, our innovative and groundbreaking system involves thorough instructions and ongoing training for our drivers.

Our drivers are the company's ambassadors, and we ensure they are well-equipped before going on the road and meeting customers at the destination. All drivers employed by Dantra Group already have several years' experience when they are hired by us, but everyone must nevertheless undergo a minimum of three weeks' special training with us. A driver only receives approval for solo driving after more test runs with a master driver. Several times a year all drivers are coached by our master drivers, who go over new regulations and requirements with them, and test runs are also carried out to ensure compliance with all procedures.

***"WE ARE PROUD OF OUR QUALITY-CONTROL SYSTEM AND OUR MASTER-DRIVER SYSTEM, WHICH HAVE LED TO A SIGNIFICANT REDUCTION IN THE LEVEL OF DAMAGE AND ERRORS."***

We are proud of our quality-control system and our master-driver system, which have led to a significant reduction in the level of damage and errors. Our systems undergo continuous assessment and development. In the event of mistakes we ensure that procedures are implemented so we can avoid similar errors or mishaps in future.

The speed limiters in Dantra Group's trucks are set to a maximum of 80 km/hr. for Denmark and 85 km/hr. for the rest of Europe. All trucks are also fitted with red safety belts. This is a choice we have made in order to focus on the use of safety belts and demonstrate that we take safety seriously. In addition, we only purchase trucks that feature a high level of safety and driver comfort. Alcohol interlock devices are installed in all our vehicles.

Dantra Group's modern fleet-management system provides five years' traceability, which means we can at all times track our transport operations and monitor them via satellite. We can thus always extract relevant information on each run from our system.

Driver and master driver operating an alcohol interlock device.

## JOBS AT DANTRA GROUP

At Dantra Group, we have employees with a wide range of skills at all levels. We are more than 200 employees, who are either drivers or hold more administrative positions in the office and in our transport and customer service department.

We have positions in sales, finance, administration, bookkeeping and IT, and we of course also have every conceivable job function in the fields of freight forwarding, distribution, warehousing, repair workshops and vehicle wash facilities.

Common to all job functions is a constant focus on solutions, collaboration, service and quality. We also place an emphasis on individual employees' professional and personal development. We focus on training and upgrading of skills, so at Dantra Group you are guaranteed an exciting and challenging job or traineeship in a dynamic and informal environment. We are serious about our responsibility for safeguarding the industry's future, and have initiatives for ongoing training and bringing in new manpower.

At Dantra Group, family values are the top priority. Every year the company chooses to contribute to support organisations for families affected by illness, in the hope of helping bring just a little light and hope in these hard times.

We work continuously on being a healthy, safe and inclusive workplace where there is room for diversity. Our initiatives include health insurance, focusing on reducing occupational accidents, flexitime and sheltered jobs. Frequently events are planned, offering the opportunity to socialise with colleagues within and across departments, and we have the pleasure of often being able to celebrate staff anniversaries. We make sure our employees know that their safety and job satisfaction are very important to us, and that we consider ourselves to be one big family.

Tank cleaning of a tanker.

## EFTCO-APPROVED TANK-CLEANING STATION

As well as the road transport business, Dantra Group also has its own tank-cleaning station and vehicle-washing station. Dantra Group's tank-cleaning station is among the most up to date in the industry.

Our tank-cleaning station can wash and clean tankers, silo vehicles, tank containers and all accessories. After cleaning, an EFTCO cleaning certificate is issued. Our station has ISO 9001, ISO 14001, SQAS and EFTCO certification.

At Dantra Group, we focus on the environment, are continuously developing our facilities in accordance with the latest regulations and are in close dialogue with the environmental authorities. The vehicle-washing station separates, reuses and cleans a large proportion of the detergents, chemicals and water used.

Our station for inside cleaning of the tanks is equipped with a heat exchanger, allowing recovery of large amounts of the energy and heat used in the cleaning process.

## OWN MODERN WORKSHOP

Dantra Group has two repair workshops, located in Hjøllund and in Køge, as well as modern driver facilities in Hjøllund, Padborg and Køge. The repair workshops are used for servicing and safeguarding of our own equipment at regular servicing intervals.

At our repair workshops, we gather expert knowledge about our tankers and continuously optimise our maintenance and servicing procedures to ensure our equipment is in optimum condition.

Dantra Group also has its own servicing vehicles, enabling us to quickly provide assistance and servicing if our own equipment breaks down during transportation.
