- both today and tomorrow*

Quality and innovation since 2001

Since 2001, GMPack ApS has provided high-quality packaging solutions for pharmaceuticals, nutritional supplements, and cosmetics.

Founded by Margith and Flemming Christensen, we are a modern, GMP-approved packaging facility in Hadsund, Denmark. Today, led by siblings Christian and Amalie Kjærgaard, we carry on the family tradition of quality and innovation.

Christian heads GMPack, while Amalie heads our sister company, Beauté Pacifique.

Our history

Margith and Flemming started with a vision to create cosmetic products. They purchased a building with a small packaging plant and have since expanded into advanced packaging solutions for a wide range of pharmaceuticals. Today, we are a modern, family-owned business with short decision-making processes and a focus on innovation and quality.

Our values

We believe in mutual trust, collaboration, and diversity. Our employees range from trainees and recent graduates to experienced employees over the age of 70, and they come from a variety of backgrounds and countries. We work as a team and value each employee's individual experiences and perspectives.

Pharmaceuticals and nutritional supplements

GMPack ApS specialises in the manufacturing and packaging of pharmaceuticals and nutritional supplements.

We provide advanced packaging solutions that meet the highest levels of quality and safety.

Our contract packaging department is expanding, with investments in robots, new equipment, and modern facilities, such as refrigerated containers for safe medicine storage.

We handle a wide range of pharmaceuticals, including tablets and capsules, and have both a pharmaceutical handling licence (paragraph 39) and GMP certification. Our commitment to sustainability is documented by our EcoVadis approval, which we are constantly striving to improve.

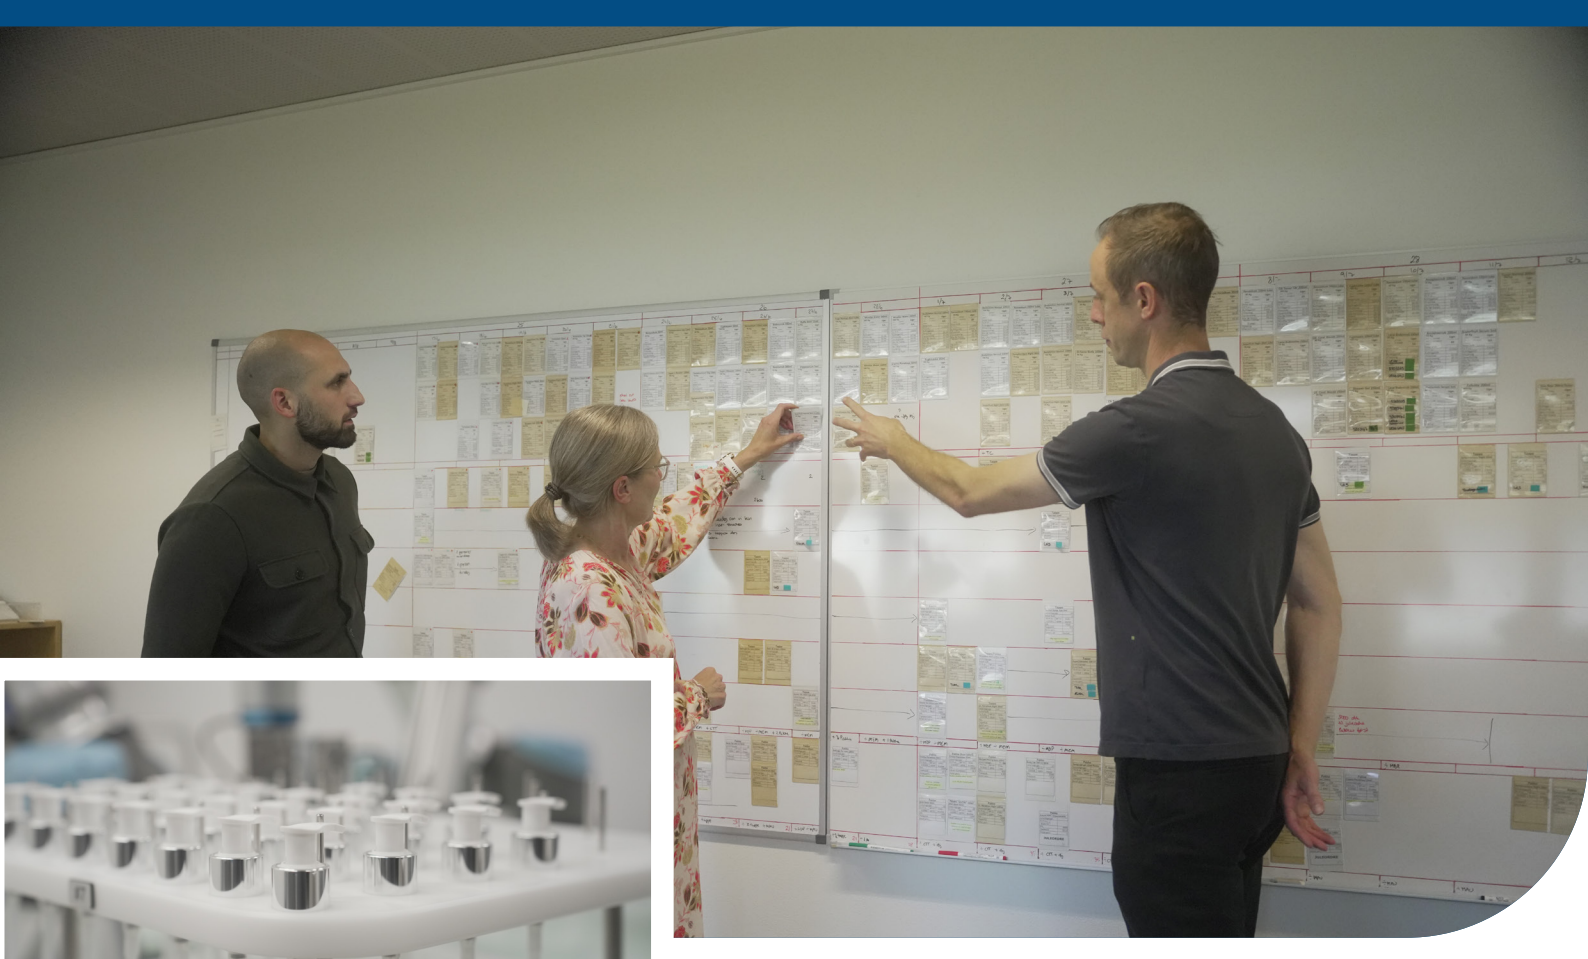

At GMPack, we continuously make investments in order to meet our customers' needs and requirements, and we guarantee that all products are handled with the utmost care and precision.

Design for Environment

Creating value for a sustainable future

Beauté Pacifique

Beauté Pacifique is our exclusive skin care line created in close collaboration with GMPack, resulting in products of unparalleled quality and efficacy. Our pharmaceutical and cosmetic expertise enables us to create skin care products that meet the highest quality standards and produce proven results.

As a cosmetics manufacturer and packaging company for pharmaceuticals and nutritional supplements, we draw on our pharmaceutical expertise to develop Beauté Pacifique.

Our quality system and adherence to GMP legislation ensure that we meet the highest quality standards. From development to finished packaging, we collaborate closely with Beauté Pacifique to deliver skin care products that set new efficacy and safety standards.
