

# HYDRA TEKNIK

QUALIFIED SERVICE AND MAINTENANCE OF HYDRAULIC SYSTEMS

Hydraulics & electrical installations

**Marine • Offshore • Industry**

# ABOUT US

## Dependable, high-quality hydraulics with excellent service

Hydra-Teknik is a company that specialises in hydraulics and marine electrical installations.

We solve problems with hydraulics and marine electrical installations of all sizes, and our experience spans the marine, offshore, and industrial sectors. And we are available 24 hours a day, 365 days a year.

We focus on providing high-quality hydraulic solutions while also striving to provide the best solutions for each individual customer. That is why, whenever we take on a new project, we strive to understand our customers' businesses and objectives. We achieve the best results through dialogue and cooperation, whether it is for assembly, service, design, or advice.

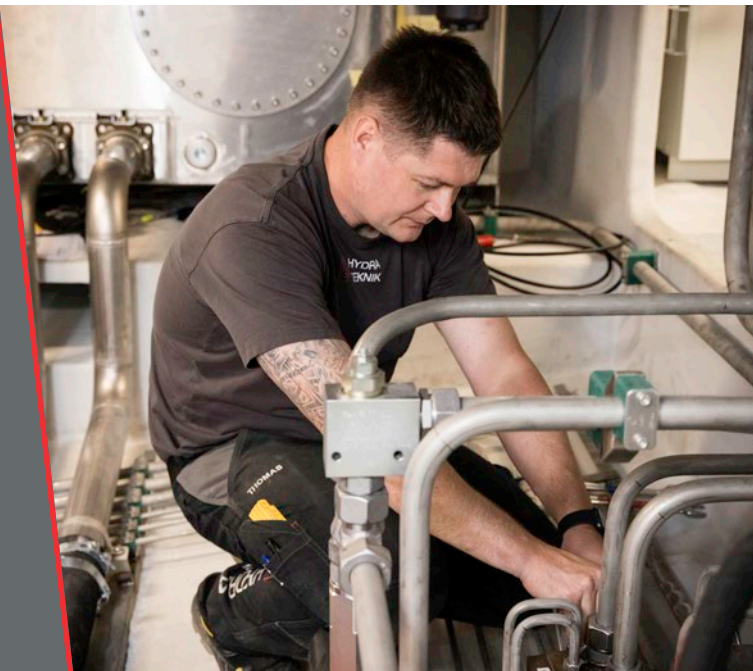

## Experience and innovation

Hydra-Teknik is the result of many years of hydraulics experience. However, top-tier hydraulics do not come from experience alone.

In an industry that is constantly evolving and where operational problems or breakdowns can have serious consequences, innovation is a key word.

Hydra-Teknik is up to date on the latest trends, and we tailor service solutions to each individual hydraulic system and each individual customer.

We have our own marine electrical installation specialists who work on hydraulic projects as well as other marine electrical tasks.

# WE OPERATE IN THESE AREAS

## Marine, offshore, and industry

Hydra-Teknik is your on-land and on-sea partner. Surroundings and industry are secondary concerns for us; what matters most is hydraulics, as well as close dialogue and a thorough understanding of the customer's requirements. When you work with Hydra-Teknik, no job is too small or too large.

## Marine

Hydra-Teknik uses hydraulics and electrical installations to solve all marine tasks. Our capabilities include fishing, aquaculture, offshore boats, ferries, and special vessels.

## Offshore

Hydra-Teknik installs, services, and repairs hydraulic equipment on offshore rigs, platforms, and other

installations. We have special competencies in the energy sector, for example, as a result of our ongoing collaboration with EOS.

## Industry

Hydra-Teknik provides service, maintenance, troubleshooting, repair, and optimisation for all hydraulic industrial machines. From plastic moulding to food processing and crude oil processing, we cover it all.

## Sales and consultation

Hydra-Teknik provides component sales as well as solution and component selection advice. Our specialists assist customers with everything from simple phone advice to project management during plant installation and commissioning.

## OUR SPECIALTIES

### Development, manufacturing, and assembly

Hydra-Teknik values competence, quality, and, most importantly, flexibility. Our goal is to add value to the customer's experience by providing the best service where the customer wants it.

We want to be with the customer from beginning to end, so we provide design, development, manufacturing, and assembly, but we are also available as a service partner on existing plants, including optimisation advice.

### Hydraulics (marine, offshore, and industry)

We offer:

- Service and maintenance
- Troubleshooting and repair
- Design and consultancy
- Energy and noise optimisation
- Development, manufacturing, and assembly
- Service and inspection of marine cranes

### Marine electrical installations

We offer:

- Service and maintenance
- Troubleshooting and repair
- Design and consultancy
- Development, manufacturing, and assembly
- Energy optimisation

- Plade- og svejsearbejde
- Bearbejdning
- Vandskæring af alle typer materialer
- Eftersyn og godkendelse af kraner

## SERVICE, MAINTENANCE, REPAIR, AND SALES

### Our DNA is built on hydraulics

Hydra-Teknik was founded on the business principle of providing excellent service and flexibility. That is why we are always available to our customers – 24 hours a day, 365 days a year.

We work in our own workshop or on-site, depending on the situation. We respond quickly to any task, large or small, with service vehicles and two mobile workshops.

We respect the customer's wishes and are eager to engage in dialogue with the customer in order to meet the customer's wants and needs. Not more, not less.

### Top quality work is a matter of course

Customers who return to Hydra-Teknik are paramount to us. Our goal is to build a strong trusting relationship with the customer so that we continue to choose each other.

The same is true for our capable and dedicated employees. We know that without them, we would not be our customers' preferred business partner.

As motivation to always provide the best service to our customers, our employees must have the best workplace. We never have to ask our employees to do a good job. As part of Hydra-Teknik, they know that top quality work is a matter of course.

## A SMALL COMPANY WITH A BIG HEART

With more than 30 years of experience in the energy sector worldwide and hundreds of projects, we have survived on four things:

Personal relations, 24/7 service, always putting people at the core and keeping it simple.

**Trust and long-term relationship  
are our keywords.**
