Watch a film about Kærgaarden

Welcome to **Kærgaarden**

Kærgaarden is a plant and pig property in Vesthimmerland Municipality. The family has owned the farm since 1980, when it had 80 sows and 40 hectares.

We focus on producing pigs and plants. In addition, we have our own maintenance department, which handles a variety of tasks as well as construction and renovation projects.

Room for transparency and cooperation

We have a dedicated team of 23 employees, including the owner and some part-time help, and within our close and committed community we work together to achieve our goals.

Our farm has its own machinery with everything needed for a modern operation. We understand that we take up space and occasionally smell, but we are responsive, so please do not hesitate to contact us so that we can be as considerate as possible in the local area.

We value transparency and cooperation with our stakeholders, as well as the trust placed in us by our business partners. Our company's supporting elements include innovation, new thinking, and solid craftsmanship.

We work hard to produce and deliver high-quality products while keeping professionalism, safety, and orderliness in mind.

Foder er som bekendt den største omkostning i en produktion – og er dermed et sted, hvor der kan spares rigtig mange penge. På denne front kommer de mobile blandeanlæg ind som et alternativt og stærkt koncept.

Ved mobilt blandet foder har landmanden altid kendskab til sine råvarer, og han kan til enhver tid besigtige råvarerne for lugt og konsistens – og dermed sikre frisk foder.
