

Safer together

Your integrated  
gas safety  
partner

MAERSK  
H2S SAFETY SERVICES

# We assist our partners with a safe and efficient operation - free from concerns related to toxic gases and substances.

At Maersk H2S Safety Services, collaboration is key. As close partners with energy companies worldwide since our establishment in 1985, we offer leading safety solutions and services that is synonymous with first-class personnel and equipment.

Our experience extends almost 40 years back to Maersk's first drilling platforms in the North Sea, which demanded protection against the risk of Hydrogen Sulphide (H2S) leaks. We now have more than 2,000 references from operations worldwide.

#### **Customized solutions, joint effort**

Together with our partners, we provide customized solutions to fit every need.

We have over 50,000 pieces of safety equipment in stock and a staff of over 500 specialists ready to support our partners.

#### **Our PEOPLE**

Our safety supervisors have extensive experience from our partnerships with the international oil, gas & energy industry.

#### **Our SERVICES**

From the moment we are approached, we ensure that the services provided are tailor-made to the specific requirements.

#### **Our EQUIPMENT**

Our experience has helped us put together a range of equipment for all conditions and scopes required by our partners. The equipment is selected to function optimally even under harsh conditions.

#### **SUSTAINABILITY**

We continually rethink and reframe our impact. We work with sustainability at all levels and strive for a minimal environmental footprint.

## Maersk H2S Safety Services operates from various locations globally

**Denmark (Esbjerg)** – Our head office. This is also the location of our main warehouse, where the storage, maintenance and certification of our equipment takes place.

**Italy (Viggiano)** – Our largest operations in terms of personnel. Operations are mainly onshore on major refineries. Our services include HSE, Environmental and H2S Safety Services.

**Brazil (Rio de Janeiro)** – From our location, we are always ready to support Brazil's oil and gas industry, which operates under unique conditions due to the large underground content of CO2.

**In addition, we have bases in:**

- United Arab Emirates (Dubai)
- Australia (Sale, Victoria)
- Norway (Straume)
- United Kingdom (Aberdeen)
- Brunei (Kuala Belait)
- Congo (Pointe Noire)
- Qatar (Doha)
- Saudi Arabia (Dammam)
- Malaysia (Kuala Lumpur)

# Our People

Maersk H2S Safety Services has more than 500 experienced safety supervisors, dedicated to assist our partners.

An extensive training program ensures that our supervisors are always up to date on the latest technology, in order to accommodate the changing needs of our partners.

Our safety supervisors also provide training and briefing of our partners' personnel. This takes place as e-learning, in the classroom with practical exercises and on site.

Maersk H2S Safety Services offers basic training in H2S safety, as well as advanced training in shutdown and rescue work under critical conditions (confined spaces).

#### Planning, implementation, training

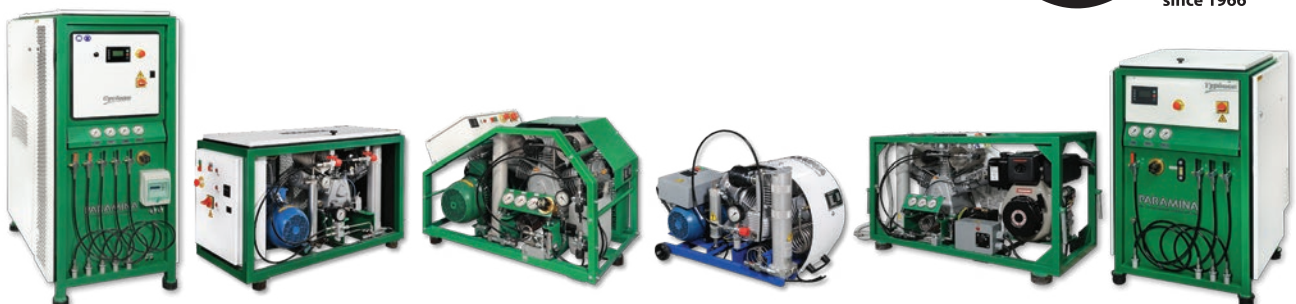

Our safety supervisors analyze needs and safety risks prior to project initiation. They install and maintain safety equipment for our partners, brief and train on-site staff and establish the right procedures for gas safety management.

## Don't Compromise The Air You Breathe!

Manufacture of Breathing Air Compressors (420bar max) & Compressed Air Systems ensuring safe operation & pure Breathing Air (acc. to EN 12021), even in contaminated environment via H<sub>2</sub>S, CO, CO<sub>2</sub>, H<sub>2</sub>O & VOC monitoring & alarm; suitable for Firefighting, Oil & Gas/H<sub>2</sub>S protection, Diving, Marine & Offshore, Defense applications.
