Solutions for everyone

NIKODAN

PROCESS EQUIPMENT

Solution provider of process equipment

NIKODAN is a solution provider that has all the skills and production facilities in-house – from concept to the final product, from engineering and construction to production, installation and service.

We offer both standard process equipment and machinery, that are ready to install, as well as customized solutions. We are able to design and manufacture custom conveyors, machinery and complete handling and conveying systems, both as a subcontractor/contractor and turnkey provider.

We have been a part of the Swedish Lagercrantz Group since 2015. The group consists of more than 50 companies, each with a niche focus on a specific submarket. High value creation is common to all subsidiaries, including a high degree of customisation, support, service, etc.

With more than 30 years of experience and +50 highly skilled employees, we develop and construct machinery, process and conveyor systems for various industrial areas. Either as a performed construction phase in close cooperation with the customer and their orders, or as a complete solution with a specific framework.

”

“We have chosen NIKODAN because they produce high-quality customised solutions with a great focus on the requirements within food safety.”

”

“NIKODAN delivers high-quality solutions with very little risk of downtime.”

”

“We know NIKODAN to be flexible and focused on finding the right solution for us.”

Smart motion technology

Powerful actuators, individual systems, high-quality mechanisms and versatile accessories – DewertOkIn offers the complete package for bedding, seating, office and medical applications. As part of Phoenix Mecano AG, an internationally active Swiss technology company for enclosures and industrial components, DewertOkIn is optimally positioned to meet the needs of these markets.

HØJ EL & AUTOMATION

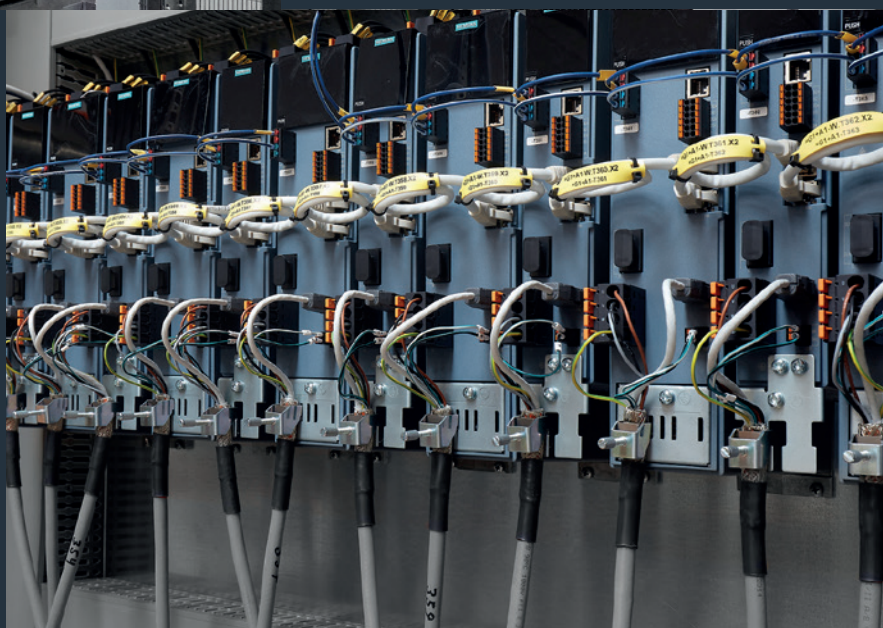

– Specialists in industrial automation

From our own control panel manufacturing or on-site, we carry out programming and complete construction of control panels for the industry. Among our specialty you find internal transport, special machinery, and packing/palletizing lines, however, our experience within automation in production lines extends much further.

We solve problems and create innovative, customized solutions. We have continuous focus on the latest control and automation technologies within our field, thus we can help secure the future of your production, regardless of whether it is new or currently operating. Energy, flow- and speed optimization, as well as extending the life of existing controls is among our key competences.

Our designers and programmers are involved from design phase until project goals are reached. We provide the necessary documentation and if desired, we assist with continuous service and maintenance.

Behind solid Danish modesty resides more than 40 years of experience and knowledge in our field. We have the expertise you require in support, repair, optimization, or servicing of older production lines, as well as the construction of new ones.

We plan and provide the solution

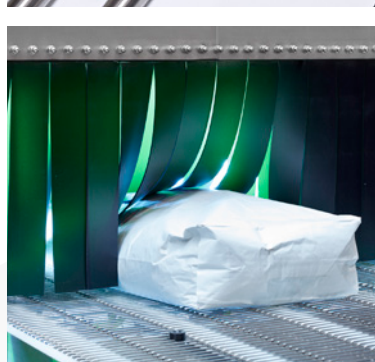

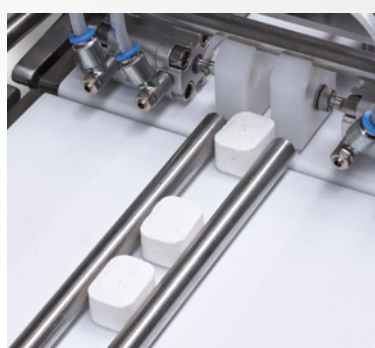

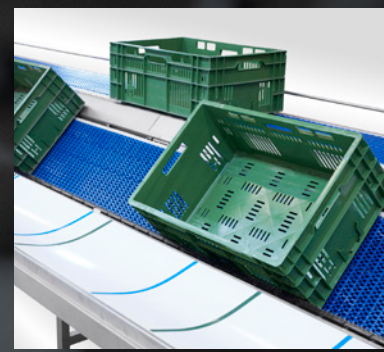

SOLUTIONS

Non-food

We provide conveyors and special machinery for modern industrial production. The handling of heavy goods, high-speed systems for small items, gentle transportation of fragile products – we plan and provide the solution.

Some of our offerings:

- UVC-tunnel for disinfection of packaging, bags and food products
- Palletizer
- Transport and handling of packaging
- End-of-line

SOLUTIONS

Meat and poultry

Food production requires high standards regarding the production process. The manufacturer must be able to comply with the current legislation regarding hygiene and safety, while at the same time ensuring an efficient production. We at NIKODAN are prepared to address this challenge.

Some of our offerings:

- Depalletizer – frozen blocks
- Shuttle conveyor
- Dry ice dosage
- Various solutions for meat and poultry

If we don't have
the solution...

We build it!

Få tryghed og sikkerhed med ECIT som din IT-partner

Hos ECIT får du driftssikre systemer, høj datasikkerhed og en grøn og bæredygtig løsning, samtidig med at du sparer penge på din IT. Vi er din digitale vækstmakker, og med mere end 20 års erfaring på markedet står vi for nogle af de mest driftssikre løsninger. Løsninger, der giver dig den tryghed, du fortjener.

SOLUTIONS

Dairy

Dairy processing is rising rapidly around the globe to meet the increasing appetite for milk and milk products from an ever-growing population.

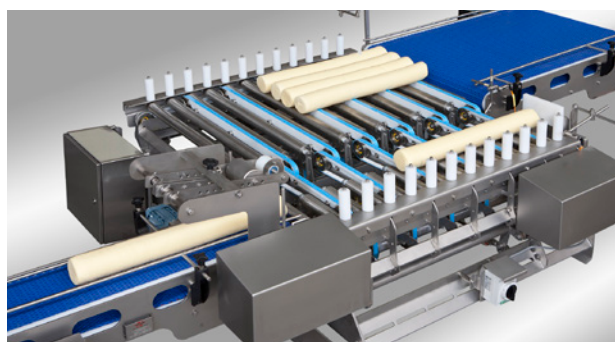

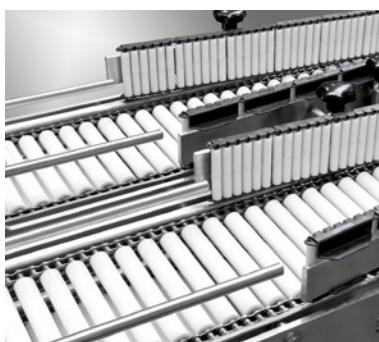

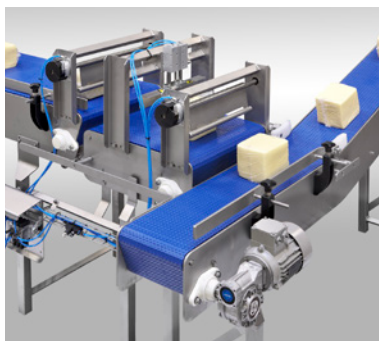

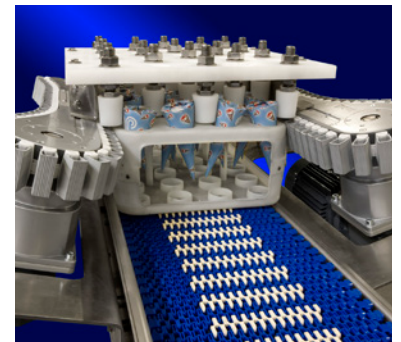

We design, engineer and supply processing equipment for handling, filling and packaging

milk and milk-based products – from butter and cheese to infant formula, milk powder and whey and its derivatives.

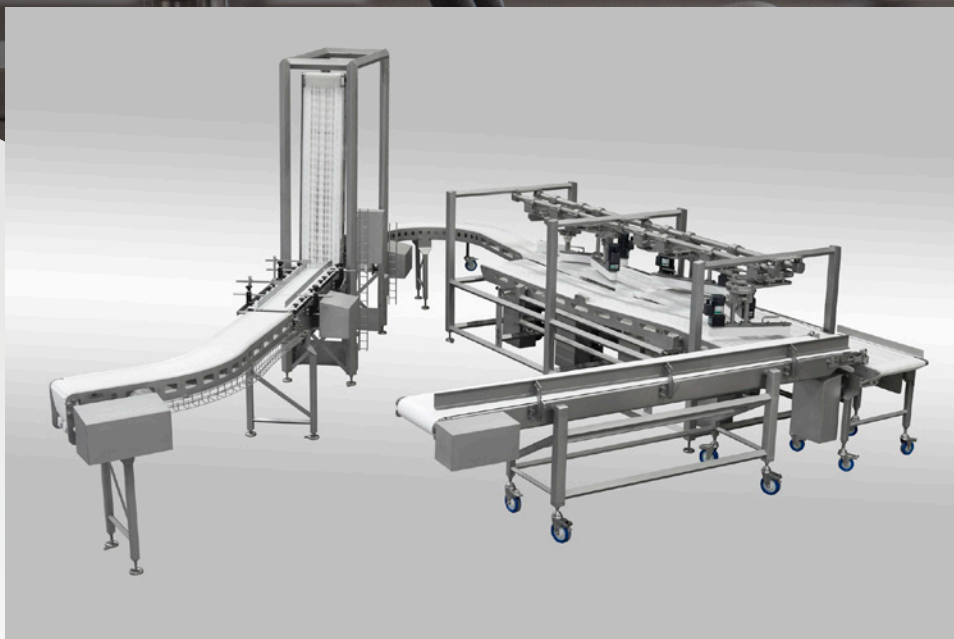

Our expertise covers project management, plant installation, commissioning and aftersales service.

We offer:

- Crystallization belt
- Infeeds
- Inliners
- Unwrapper for butter
- Various solutions for cheese handling

Solutions for **everyone**

SOLUTIONS

Pharma

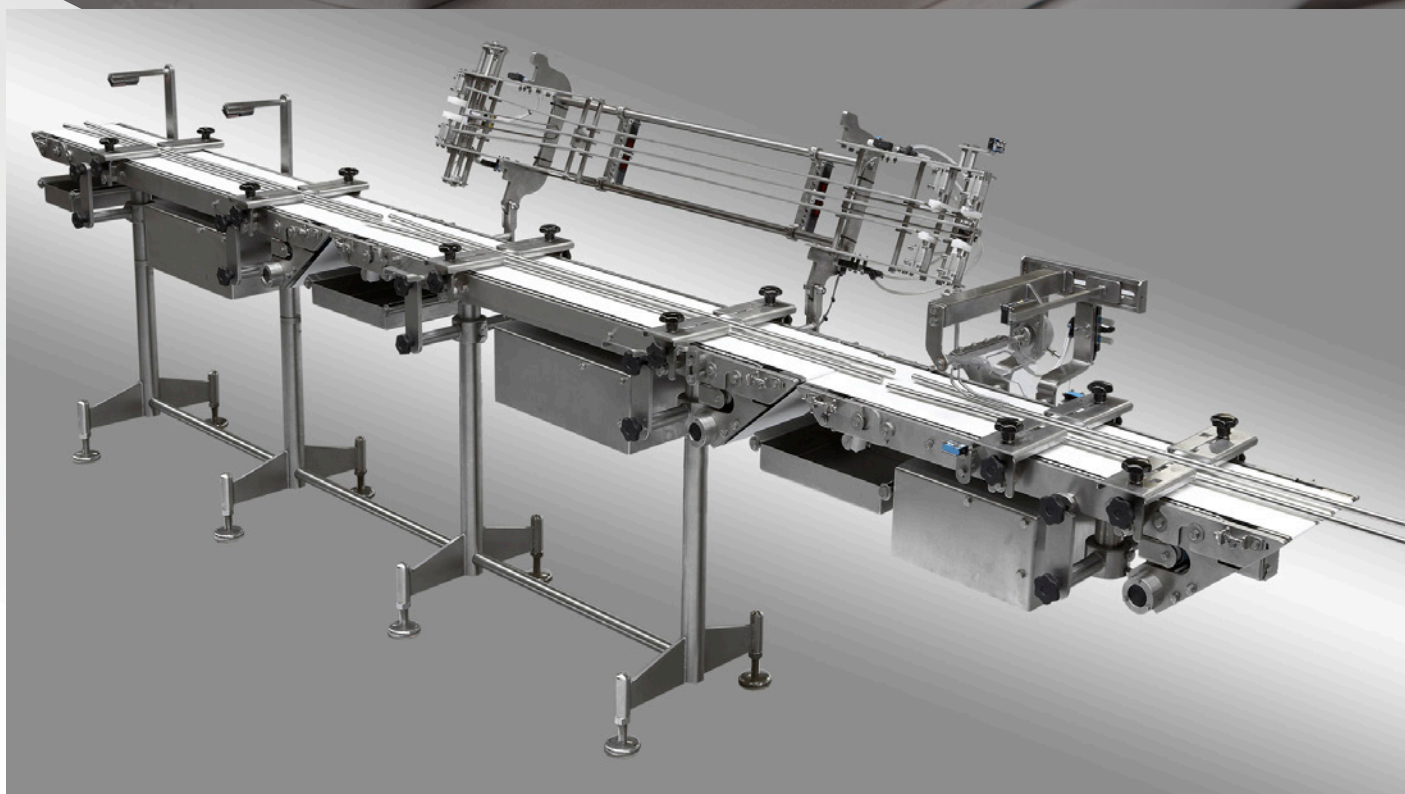

Mixing equipment has a key role to play in medication manufacturing, as this processing step is decisive to the resulting batch quality. In order to create safe and hygienic medications that contain precise amounts of active ingredients, pharmaceutical mixing equipment must be easy to sanitize and flexibly configurable in order to create batches with uniform homogeneity, purity, particle size distribution and stability.

NIKODAN solves complicated tasks for the pharma and medical industry. We create high-standard solutions that require the best materials and the best component parts.

Design, planning and production all take place at our own facilities in order to ensure a short distance between our engineers and the “clever hands” in the production department.

Clever hands smart machines

Nendan A/S - Mold casting of all kinds of solutions within polyurethane rubber – PUR - also FDA-quality rollers, wheels, mold-casted parts, etc.

We have a modern workshop with several CNC machines, therefore we can also offer complete solutions.

SOLUTIONS

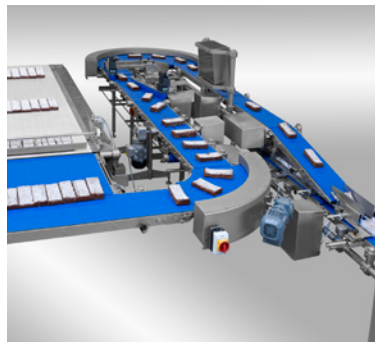

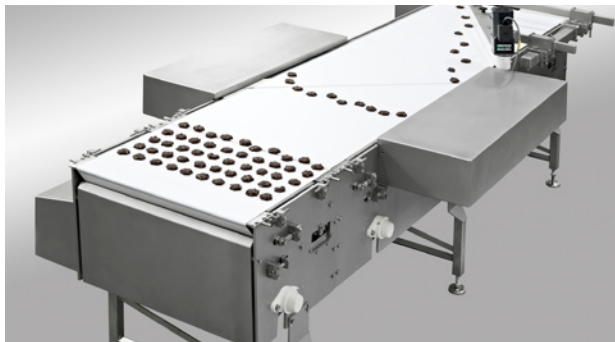

Confecture

We plan and provide solutions complying with the legal requirements – and we do it smart. Always. Because the smart way is the way to optimisation.

We look forward to knowing what you produce, and to taking a non-committal chat about a new solution for handling your products.

We offer:

- Row feeder
- Infeed systems
- Inliners
- 45 degree inliner
- Close-gap functions
- Turner
- Pull nose

SOLUTIONS

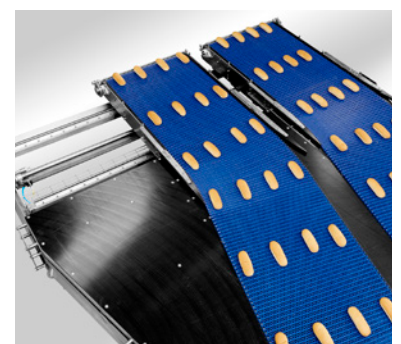

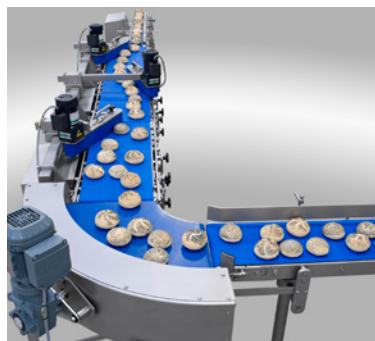

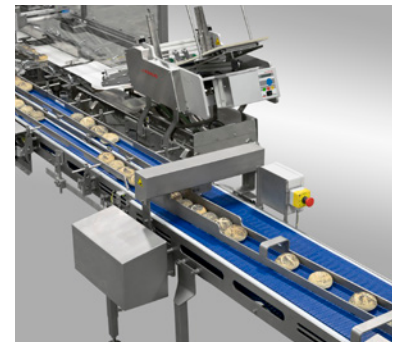

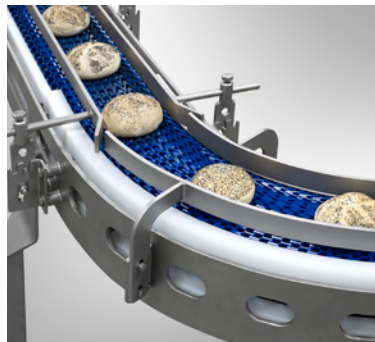

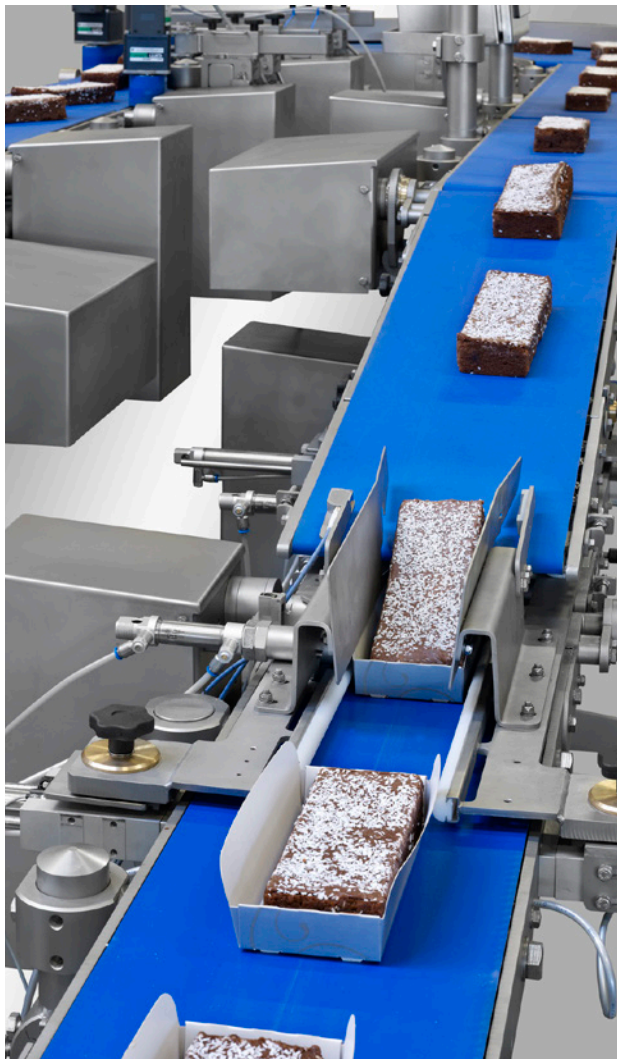

Bakery

The extensive product range covers stand-alone machines for handling and packaging. Our overriding objective is to improve customers' operational and financial performance in terms of productivity, yield, quality and cost-effectiveness. We do this by providing reliable and robust solutions that have a positive and measurable impact on our customers' businesses.

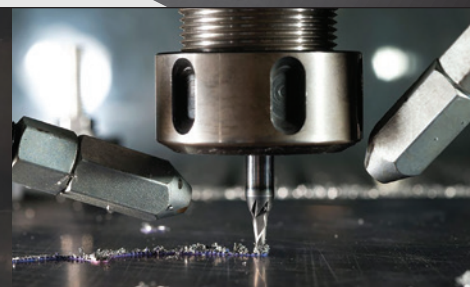

We offer:

- Row feeder
- Infeed systems
- Inliners
- 45 degree inliner
- Close-gap functions
- Turner
- Pull nose

We fill
the **gaps!**

Sustainability

Sustainability and high ethical standards are a strong strategic focus for both us and Lagercrantz Group. Besides commercial goals, we strive to have our business operations adhere to high standards of integrity and ethics. We work in compliance with the UN Global Goals for a sustainable future and we have initially launched initiatives in compliance with goals 4, 7, 8 and 12.
