

QUALITY MATTERS

SAXE

MORE THAN 50 YEARS OF EXPERIENCE

In 1967, Henning Saxe Hansen founded **SAXE Group** with a focus on injection moulding and extrusion. Through the years, the product range expanded with a large number of products for the manufacturing of plastic parts. The company started as a merchant business, in line with customer and development demands, and grew into a merchant, consulting and engineering company.

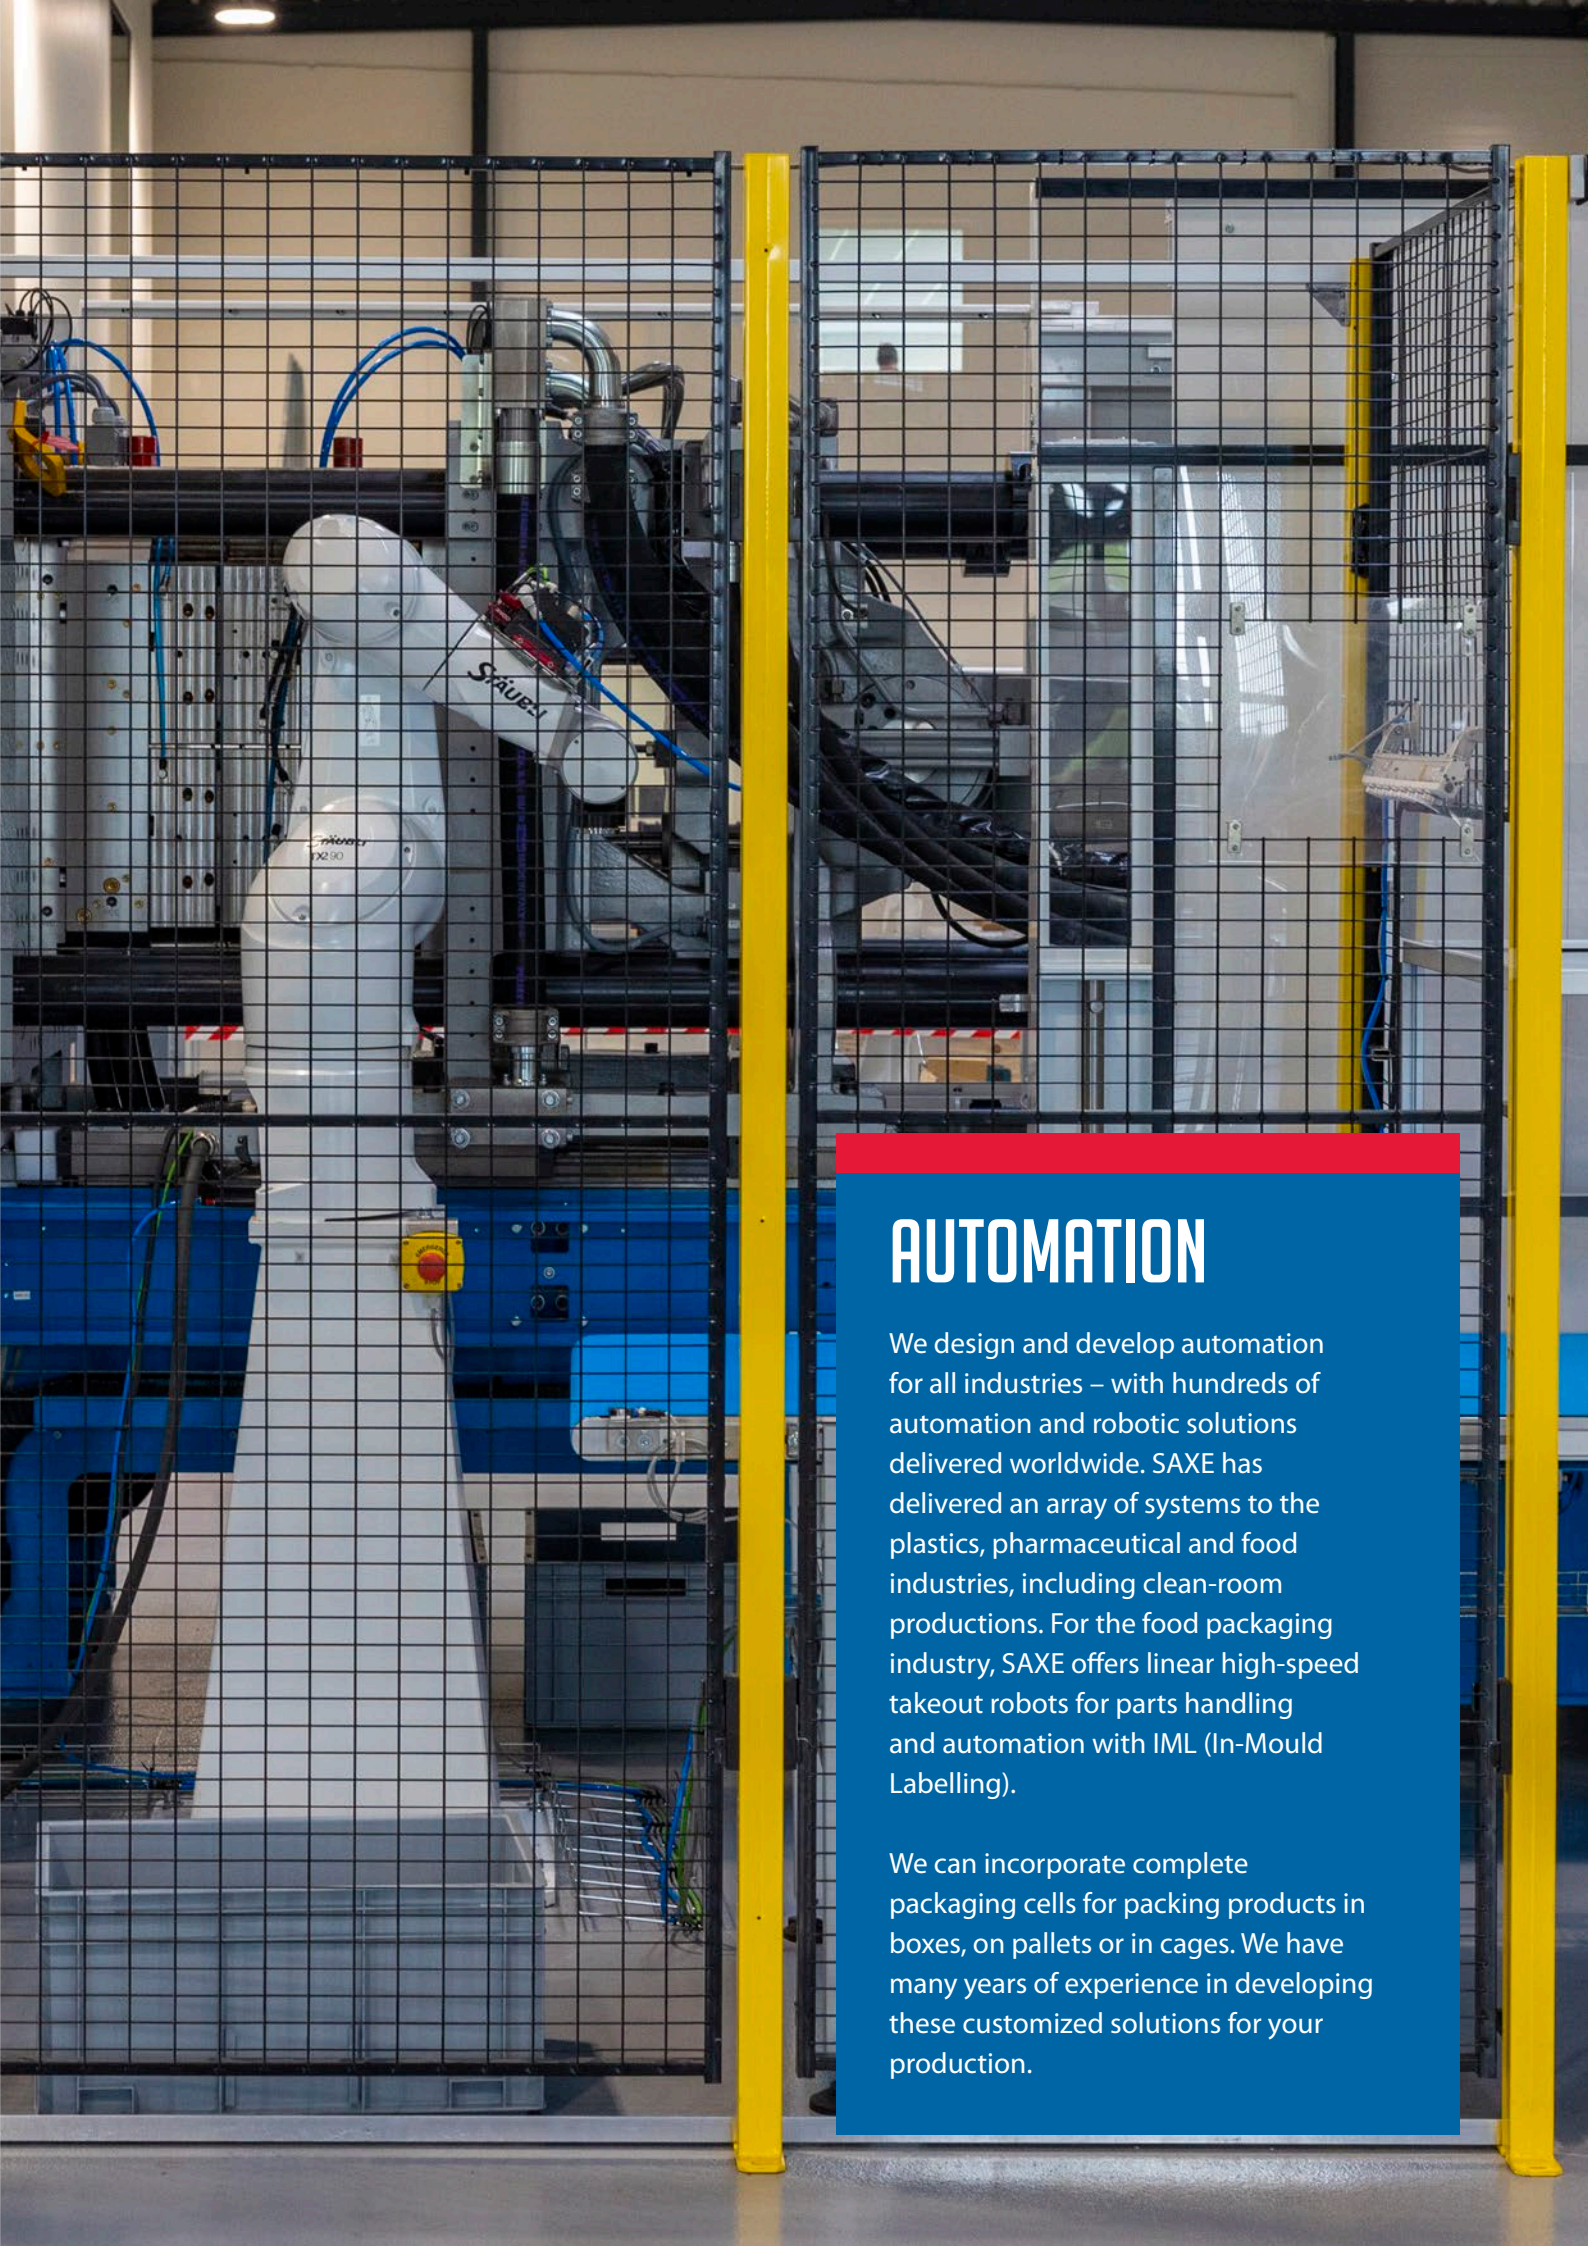

Today, **SAXE Group** is still family owned and managed by an innovative and dynamic team. We are not just a machine supplier, but a highly skilled consulting company. We employ a number of high-qualified employees with various backgrounds, and the diverse experience and qualifications of our team ensure our customers a practical and theoretical approach to the tasks.

SAXE GROUP consists of four companies, located in Denmark, Norway and Sweden. All companies have their own core competences, but are able to supply management and service for all group activities. The strength of this construction is to be able to deliver all pieces that make up the puzzle, which is essential for customer satisfaction.

OUR MISSIONS

- ✓ Knowledge creates value
- ✓ Sharing competence
- ✓ Service creates value
- ✓ Strong supply chain

AUTOMATION

We design and develop automation for all industries – with hundreds of automation and robotic solutions delivered worldwide. SAXE has delivered an array of systems to the plastics, pharmaceutical and food industries, including clean-room productions. For the food packaging industry, SAXE offers linear high-speed takeout robots for parts handling and automation with IML (In-Mould Labelling).

We can incorporate complete packaging cells for packing products in boxes, on pallets or in cages. We have many years of experience in developing these customized solutions for your production.

INJECTION MOULDING

SAXE Group focuses on high-quality injection molding machinery, dedicated to fulfill the most demanding jobs in the production phase. With a constant focus on improvement, development and optimization of their machinery, The KRAUSS MAFFEI/NETSTAL Group has proven to be second to none in this field.

Our relentless focus on continuous improvement, development and machine optimization, coupled

with industry-leading suppliers, allows us to provide solutions unmatched in the industry.

In close dialogue with you, we select the most suitable machinery for your production facility. We offer machinery at different price levels according to your needs, ensuring that you always get the most value for your investment.

Your competitive advantage.

Learn how customers achieve visibility, consistency, and repeatability in their process through intelligent monitoring and closed-loop process control systems.

POLYURETHANE

SAXE Group holds more than 40 years of experience in designing and producing highly specialized machines and complete turnkey installations for production with polyurethane foam, for example to be used with manufacturing of parts for furniture and cars, various technical parts and cabinets, as well as insulation of freezers and refrigerators. Combining this technology with composites makes the possibilities endless.

We provide you with a comprehensive product portfolio of machines and systems for PU processing in reaction process machinery. Mixing heads and dosing machines, presses, die cutters, flexible cutting systems and foaming tools, as well as machines and systems for insulation applications provide the basis for a broad spectrum of applications. This means that you always have the right solution for the task at hand.

KVALITET TIL TIDEN!

Vi er specialister i kompliceret pladebearbejdning i de fleste metaller.

EXTRUSION

SAXE is able to supply and support equipment for nearly every segment of extrusion. From micro extrusion, sheet lines, blown film lines, pipe and profile lines to special lines for medical applications and recycling lines. The most important goal for SAXE is supplying our customers with complete, high-quality lines. It is only through our extensive network of extrusion equipment suppliers that this is possible.

We represent a variety of suppliers, mainly from Italy and Germany, where the extrusion technology was born. We deliver complete systems for pipe/profile, sheets, films, blown film, blow molding and manufacturing of medical tubing for special and complex applications.

AUXILIARY EQUIPMENT

We deliver a wide variety of auxiliary equipment from a vast range of suppliers around the world. The products can be supplied as single, stand-alone units or as a part of the total delivery of a system. We are supplying material feeding systems, temperature controllers, dosing systems, dryers, granulators, conveyor belts, storage systems, molds and hot-runner systems, robots and post-treatment equipment.

SERVICE

The SAXE service team consists of technicians with high technical skills and in-depth product knowledge. Our service team can help to ensure proper installation process and that you receive the required assistance within the shortest possible response time. Whether you need service or preventive maintenance, our service team is always ready to help. We perform calibration on all equipment on-site or on-line and we are accredited according to ISO17025 by DANAK.

STÄUBLI

**Today, our robots work both
for, and with, people**

They have to be fast and precise, collaborative and agile, user-friendly and highly mobile. In all kinds of industries, they redefine performance. Even in the most sensitive environments, they make production smarter. Providing smart data, in an easily connected world, where we share our expertise. A world of solutions.
