### ➤ **Where we operate:**

- Czech Republic
- Denmark
- Estonia
- Finland
- Germany
- Latvia
- Lithuania
- Iceland
- Norway
- Poland
- Spain
- Sweden

# Our products and services

## AIR FREIGHT

We offer tailor-made solutions to provide an optimal combination of lead time and cost-efficiency to meet your expectations and fulfill your specific needs. Our service network is comprised of contracts with major carriers, as well as many niche operators to provide global coverage door-to-door. Our longstanding relations are your guarantee for high quality, transparency, and capacity.

## OCEAN FREIGHT

Our stand-alone ocean freight products FCL (Full Container Load) and LCL (Less than Container Load) can easily be combined with all other products to provide a bespoke and efficient supply chain. We cooperate with all major carriers and co-loaders whether it's short-sea or between continents.

## ROAD FREIGHT

By having one of the strongest networks in all of Europe, we offer complete flexibility when it comes to international road transport of mixed cargo, palletized cargo, partial, or full loads. You can choose from over 200 regular and direct routes within a network spanning from Northern Norway to the Black Sea. We offer a range of daily departures with short transit times in collaboration with our European network partners.

## RAIL FREIGHT

We offer weekly rail service to and from China at fixed rates. We also offer FCA/Ex Works and DAP solutions on request. The most-used rail hubs in Europe are Warsaw and Hamburg, from where we combine road transport to a Nordic warehouse or door-to-door delivery. We are also the sole neutral consolidator to offer a direct Hefei/Helsinki route, as the fastest service from China to the Nordics.

## PROJECTS

We specialize in the transport of all types of oversized cargo. Our experienced project teams manage a variety of assignments, through concentrated engineering services, vessel chartering, and a multitude of other resources that fit the job. Our collective efforts ensure the sound movement of your cargo, regardless of size or mass – be it oversized, heavy, RO/RO, or break bulk.

## VALUE-ADDED SERVICES

- **Fast-tracking customs clearance:** Negotiating best outcomes for your export and import cargo while fulfilling all legal requirements.
- **Warehousing:** Finding the optimal solution for your storage needs, whether short or long term, packing and crating, etc.
- **Cargo insurance:** Offering some of the most affordable, comprehensive, and customizable cargo insurance in the industry.

## Going green in a dirty business

At Comodality Group, we are dedicated to the UN Sustainable Development Goals and limiting the environmental effects of the freight industry. As more and more of our customers are inquiring about records of their CO<sub>2</sub> usage, we now offer to calculate their freight footprints and document their projects from start to finish.
