 IAT BASE & ENERGY

BE THE MOST

REPUTABLE PARTNER

FOR GAS

COMPANIES

MAKING A DIFFERENCE

THE POWERFUL ONSHORE BASE

Thanks to its expertise and innovative mindset IAT Base & Energy serves some of the biggest oil and gas companies in the Danish sector of the North Sea.

One of them is Ensco for whom IAT Base & Energy handles all equipment into and out of the Danish sector of the North Sea, but the company also serves DONG, Maersk Olie & Gas, Halliburton and MI Swaco.

IAT Base & Energy is a 24/7 full service supplier.

IAT Base & Energy is domiciled at Esbjerg in Denmark, and since the beginning of the 1990's it has aimed at providing the best base management services in the Danish sector.

The company is owned by C. Breinholt Ltd. which is part of the IAT group.

STRATEGY

The strategic aim of IAT Base & Energy is to become the most competitive partner for oil and gas operating companies, a partner who makes a difference.

We attempt to achieve that goal by optimizing resources within present focus areas and by developing Scandinavian tailor-made concepts and products with the highest safety standards.

IAT Base & Energy has obtained Quality Certificates according to ISO 9001:2000 in order to live up to both our clients' and our own high demands.

IAT Base & Energy also has obtained Environmental Certificates according to ISO 14001:2004. Our aim is to be able to document all relevant certification requirements to our clients.

FACILITIES & SERVICES

As a full service base operator it is the most important task for IAT Base & Energy to provide 24/7-365 service to oil companies, operators and other cooperation partners in order to support exploration and production to proceed under optimal conditions.

IAT Base & Energy's many years of experience in servicing offshore clients means that the company can now offer a constantly widening range of supplementary services including logistics, sale and leasing of drilling equipment. In addition to this IAT Base & Energy also offers a wide range of products through our associated agency partnerships.

Logistical services include purchasing, storing, handling and transport by ship or helicopter between the onshore base and the fields at sea.

"World of Logistics" is a household slogan for IAT Base & Energy while operating within the main areas that are of vital importance for the operational support of the oil and gas installations.

KNOWLEDGE & FLEXIBILITY

Through many years IAT Base & Energy has been closely connected with the oil and gas activities in the Danish sector of the North Sea. The foundation for this cooperation is an exact analysis of a client's company and activities, including an analysis of the client's own suppliers and sub-contractors.

IAT Base & Energy:

- connects offshore and onshore activities through a strong, flexible and innovative land base
- focuses on all angles of client needs and success criteria for the client's products and services
- assumes responsibility for having manpower and goods available on offshore installations precisely when needed by the customer

RELIABLE & TRUSTWORTHY PARTNER

IAT Base & Energy's many fields of competence, know-how and years of experience are the result of an intensive collaboration with enterprises within the offshore industry.

In addition we have a specialized and target oriented work force who work round the clock to ensure that clients have access to the services and equipment that are quite indispensable for the success of the operation.

IAT Base & Energy perceives itself as:

- a competent, specialized and experienced support to a client's company
- always committed to achieving best possible standards of quality, safety and environment
- an innovative firm with ongoing development of new services and products
- constantly on the lookout for new technology with focus on optimization of time, price, and quality

LOGISTICS

IAT Base & Energy takes care of every aspect of shipping, and we are on duty round the clock to ensure that goods reach their destination and that shortages do not occur.

Shipping-trained staff members with a wide range of contacts make sure that the most economical form of transport is chosen – whether by road, air freight or sea.

Expensive hired equipment is forwarded with as little idle time as possible. Shipping includes everything from worldwide service to hawser handling done at competitive prices.

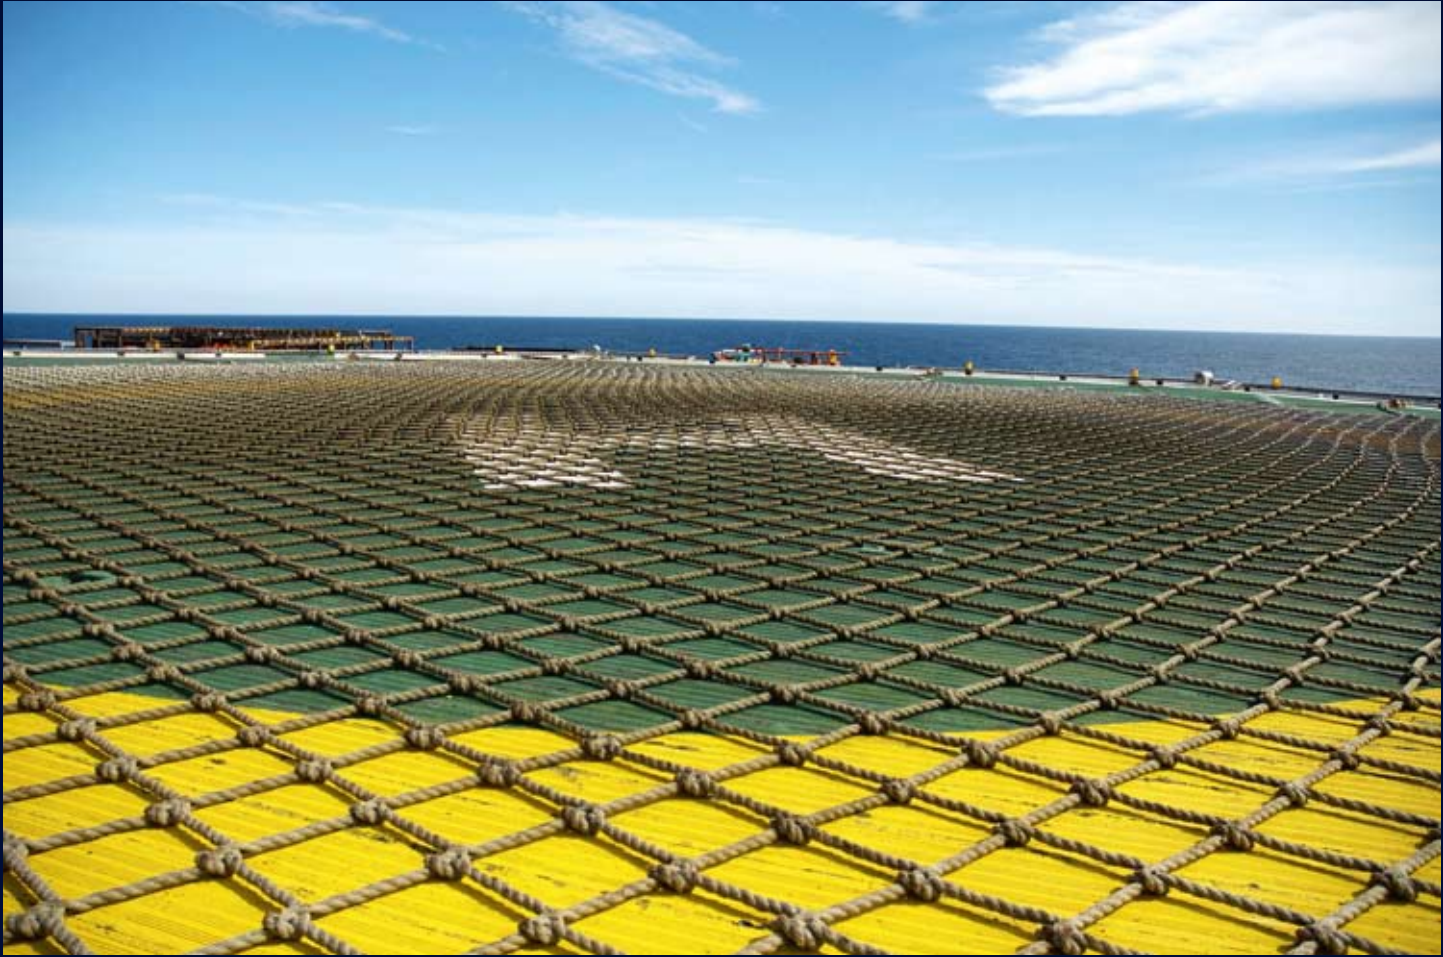

HEALTH, SAFETY, ENVIRONMENT & QUALITY

IAT Base & Energy focuses on and respects health, safety and environment and adds to this a cost conscious attitude.

To IAT Base & Energy our business philosophy is deeply anchored in occupational health, safety, environment and quality. One staff member with IAT Base & Energy is exclusively specialized in all types of certification.

Those concepts are a basic part of the way IAT Base & Energy is run, since our partners in the oil and gas industry are very demanding. IAT Base & Energy makes no less strict demands on itself, so its focus is constantly on:

- development of the work environment to ensure that all staff members have good and safe working conditions
- having all work processes described with a view to securing optimal working conditions
- a Safety Management System to safeguard our clients' safety interests in logistics
- minimizing risks – all handling of goods is organized in accordance with concise procedures
- perpetual development of enhanced systems at IAT Base & Energy

SALES & LEASING

When a North Sea operator needs drilling equipment, a vitally important spare part or any other important equipment, it is of vital importance to have a competent and efficient partner onshore with experience in delivering the goods.

IAT Base & Energy can supply: standard, special or tailor-made products certified according to DNV 2.7-1/ EN12079 to clients worldwide.

IAT Base & Energy has cooperated through many years with manufacturers in USA and Europe. Through agencies and cooperation agreements we cover a broad spectrum of equipment for the oil and gas industry:

- all sale and lease concepts are adapted precisely to the task at hand
- the concepts are the keys to technically efficient and financially sound production
- IAT Base & Energy provides 24/7 supplies of everything from food stuffs to drilling equipment
- IAT Base & Energy can provide warehouse capability

SPECIALIZED STAFF

IAT Base & Energy is a niche enterprise operating as a preferred partner for oil and gas operators. The company focuses on technologies and solutions to raise quality and safety standards, efficiency and production with the clients.

This means that nothing is left to chance. IAT Base & Energy possesses the basic knowhow of all details in base management.

A highly specialized and committed team including engineers, shipping experts, artisans, HSEQ and logistics specialists ensures that IAT Base & Energy can supply all types of solutions to the oil and gas industry, both here-and-now and the longer term solutions.

It is IAT Base & Energy's policy to perform its activities in such a way that the greatest possible regard be taken to the health and safety of staff members and other employees at the client's workplace - all the time and under all conditions.

AGENCIES - OFFSHORE CONTAINERS

The agency for offshore containers from Swire Oilfield Services is a major field of activity for IAT Base & Energy. Swire Oilfield Services is the world's largest supplier of specialized offshore containers for the global energy industry ensuring safe transport of all types of supplies to offshore platforms and rigs.

The Swire containers conform to all existing safety regulations and are certified according to DNV 2.7-1/ EN12079.

IAT Base & Energy:

- offers a comprehensive fleet of offshore containers in several sizes
- can deliver – day and night – when the need occurs
- vouches for expertise and credibility achieved through global and regional operations and experienced since the early nineties within the oil and gas industry
- looks after the daily handling of all offshore containers including inspection and service in our own workshops

AGENCIES - INSULATION

IAT Base & Energy has agencies for fire retardant and insulation materials primarily intended for service pipe.

Benarx® –or pipe insulation systems – has been developed in Norway and is in use all over the world.

Benarx®:

- combines thoroughly tested application areas with new and innovative solutions
- has been tested for efficiency and durability under the most severe conditions in arctic areas
- the products offer a wide range of solutions for largely speaking all demanding tasks whether the requirement is robustness, high insulating capacity, durability – or a combination of those requirements
- adapts their products individually to suit the client's needs

AGENCIES - COMPRESSORS

IAT Base & Energy has agencies for Scan Tech explosion proof compressors and a wide range of other Scan Tech products.

Our cooperation with Scan Tech's compressor departments is characterized by good service, high technical proficiency and many years' experience as leading suppliers of compressors to the oil and gas industry. IAT Base & Energy can supply diesel powered compressors of various sizes to meet most needs both on and offshore.

The compressors are:

- developed, designed and produced in close cooperation with the client
- air compressors with a capacity of up to 50 m³/min and a working pressure of up to 25 bar
- zone 2 rated explosion safe mechanical tools that may be used in any place with potential gas leakage because they have special filters, air inlets and exhausts
- the compressor is build-in to a DNV 2.7-1/ EN12079 certified skid container

AGENCIES - PUMPS AND LIFTING GEAR

IAT Base & Energy is an agent for Scan Tech's other products. Scan Tech develops pumping systems, high pressure machinery, lifting gear and steam based solutions.

The steam and high pressure department is the leading producer and supplier of offshore steam and high pressure products in Europe.

Scan Tech has its own design and production team which can design equipment precisely adapted to a client's specifications and requirements.

IAT Base & Energy can also supply cranes and lifting gear specially suited for use in the offshore environment. Scan Tech lifting department is at present Europe's largest supplier of lifting gear with a range from 0 to 250 tons.

IAT Base & Energy is pleased to provide a tailor-made, innovative concept for any task, which enables an efficient and safe lifting operation.

AGENCIES - WELDING HABITATS

IAT Base & Energy is agents for welding habitats for sale or lease. Sveisolat® is a modular based pressurized welding habitat solution with its own control system.

The system is used for optimal safety during hot work operations in production areas on petrochemical plants on or offshore. The welding habitats can be combined with air locks in areas with dense traffic. The advantages are:

- with Sveisolat® production can be maintained while the hot work continues
- safety and quality considerations are improved due to minimum risks
- Sveisolat® consists of module divided tarpaulins with fixed measurements which can be combined and extended as required, mounting being simple and flexible

In addition, the following units are available with Sveisolat® MGD (mobile gas detector), magnetically operated, air powered fan, flexible air hose and alarm panel with emergency stops

AGENCIES - WASTE MANAGEMENT

IAT Base & Energy offers solutions for the onshore and offshore industry to environmentally sound treatment of waste in collaboration with the Norwegian company SAR.

Waste handling can be tailor made and developed as individual technical solutions for both industrial waste, dangerous goods and drilling waste.

This concept comprises all imaginable aspects within the field of transport and handling of dangerous goods and other chemicals. The client may choose the parts that suit his needs.

Aviation Fuel Service

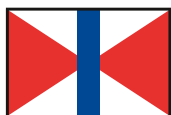

Swire Oilfield Services is the world's largest supplier of specialist offshore cargo carrying units to the global energy industry and is a leading specialist in helicopter fuel systems and chemical handling services.

We can provide standard, specialized or tailored products certified to DNV 2.7-1 or EN12079 to customers anywhere around the globe. Our extensive hire fleet allows immediate access, 24 hours a day, to a comprehensive range of products.

Through our global and regional operations, we offer our clients the expertise and reliability borne of nearly 30 years experience in the industry.

Swire Oilfield Services is certified to ISO 9001, ISO 14001 making us your natural choice when considering your offshore needs.

SWIRE OILFIELD SERVICES

Proserv – the engineers' engineers

As demand for energy grows, oil and gas companies need ever more technically specialised services. The engineering challenges are significant, and the industry continues to expect more. The Proserv Group has developed to meet this growing need.

Established for more than 30 years, our group of companies offers wide-ranging yet niche technical expertise to international oil and gas markets. Environmentally conscious and with a reputation for being industry leaders and pioneers in our field, we are committed to providing innovative, flexible, responsive and reliable products and services.

End-to-end solutions

5 Strategic Business Units

Focusing our services and products on the ever – evolving challenges of the industry around the world, we have developed the Proserv Group to offer international leadership across five Strategic Business Units.

-  Test and Control Systems
-  Instrumentation and Calibration
-  Oil and Gas Sampling
-  Abandonment and Decommissioning
-  Speciality Machining

Whether your project requires a single focus or a collaborative approach, the expertise and services these business units provide can be tailored to respond appropriately to every challenge.

Test & Control systems

No matter how complex or specific your requirements, we can design and custom-build the test and control equipment and systems to fit them. In close co-operation with leading brands (Autoclave Engineers, Haskel Energy Systems and LEWA Pumps,) the product portfolio typically includes design and engineering of:

- Smart well control systems
- Test and flushing units
- Topside and subsea HPU's
- Wellhead control panels
- Wireline equipment
- Chemical injection equipment

Instrumentation & Calibration

The oil and gas industry demands and deserves high standards, with precision and reliability vital to all equipment, systems and operations. Our extensive scope of services, including equipment management services, is supported by an impressive track record in-house, onsite, onshore and offshore:

- Hire of equipment
- Calibration services
- Trading of leading brands

Oil & Gas Sampling

Accurate, representative sampling and analysis of oil, gas and water is critical during both the exploration and production phases of a reservoir's development. Proserv has been an internationally renowned supplier of specialised surface and subsurface sampling equipment and associated accessories.

- Production sampling systems, cylinders and cabinets
- Automatic and manual sampling systems
- Promix homogenizing system for water content analysis
- Subsea sampling
- Portable lightweight sample cylinders
- Sample cylinder hire
- Down Hole Sampling

Abandonment & Decommissioning

When you have structures underwater and below the seabed that need cleaning, dismantling and removing, you rely on highly advanced precision engineering. As a global leader in subsea applications, Proserv provides flexible and reactive solutions – from the installation and maintenance of the structure to decommissioning at the end of field life.

- Well abandonment and decommissioning
- Subsea and marine technology
- High and ultra high pressure pump services

Speciality Machining

Oil and gas operations often present very niche and highly technical engineering challenges, requiring very specific solutions. When you need highly specialised products in small quantities, our Speciality Machining business unit has the expertise and resources to supply them. Our facilities and areas of expertise include:

- Five axis machining centres
- Specialised software, such as Solid Edge DAC / DAP
- Prototyping
- Small series

Can do.

LIFE - LINE TO THE NORTH SEA

Although Lysholdt is based in Scandinavia and thus naturally deals largely with Northern and Central Europe, the company uses its own vehicles to cover a much larger area. Logistics is a vital element in the transport sector, and Lysholdt employs all means of transportation from vehicles to ships, planes and helicopters.

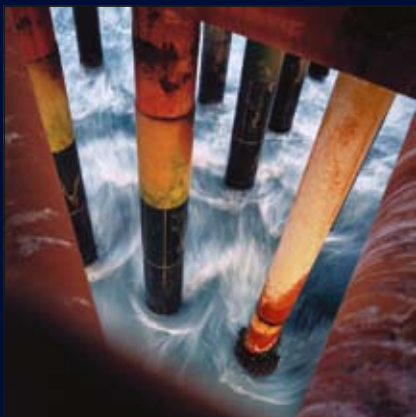

Lysholdt's location in Esbjerg provides the company with natural advantages as a supplier to the offshore industry. Lysholdt has invested heavily in the equipment needed to meet the high standards and safety requirements which apply to all deliveries to platforms in the North Sea.

This includes special containers for supplies such as refrigerated and frozen goods which ensure that all the requisite cooling and freezing temperatures are observed. Lysholdt also supplies stores and provisions for the supply vessels, monitoring vessels and diving boats that service the offshore installations.

THERE'S NO COMPROMISE ON QUALITY

Waste management is value management

Save time and money at the same time as you help save the environment.

Our waste chain concept follows your resources from when you buy them to when you get rid of the waste.

We collect your waste. You do not have to worry about the transport.

We sort your waste and decide what should be reused, what should be recycled and what should be processed further.

We assess your procurements and advise you how you can think resource and waste management from the first link in the chain.

We are your information bank and offer courses, training and consulting.
