

From Ideas to Production

**SPECIALISTS IN
THE DEVELOPMENT
AND MANUFACTURE
OF TOOLS**

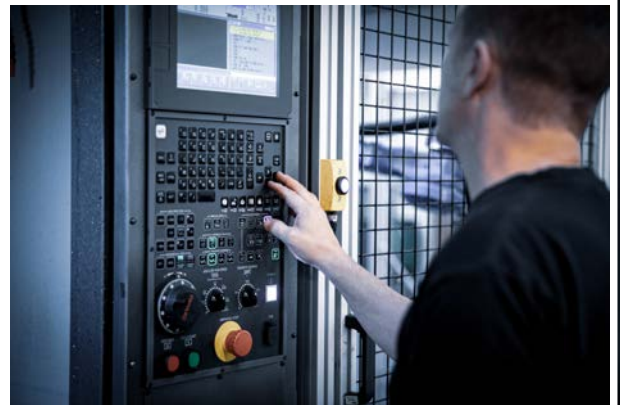

Creating tools for all industries

At Uni-Technology A/S, we focus on quality, service and flexibility. We develop and manufacture tools for all industries, and our frequently innovative approach to the solutions means that we often solve tasks far beyond what is expected. Alongside decades of experience and expertise, this allows us to take on more technically demanding tasks.

We offer sparring to our partners throughout the process – whether on existing projects or completely new development – and we make sure to set a common goal for both ambitions, finances and strategy.

FROM IDEA TO PRODUCTION

Even though Uni-Technology A/S is highly specialized in quality tool production, we have made it a point of honor to be part of the entire value chain from idea to finished product. Each customer has their own approach to a task, and we simply fill in as needed, whether on the initial design, making prototypes or manufacturing tools. This is where our continuous sparring with the individual customer comes in.

P R O T E C H

Stratasys' professional 3D printers for making powerful prototypes, fixtures, tools and end products.

The advertisement features a red background with a technical illustration of a mechanical part being machined. A red tool bit is shown in the process of cutting a series of wavy, undulating grooves into a metal workpiece. The Mastercam logo is prominently displayed in white and red, with the word 'Master' in white and 'cam' in red. Below the logo, the text 'Mastercam Dynamic Motion' is written in white, followed by the tagline '— The speed and efficiency of the future — now!'. At the bottom left, there is a logo for 'DYNAMIC MOTION' with a stylized red and white arrow. At the bottom right, the text 'See more at www.mastercam.dk' is written in white, and the 'CIMCO' logo is displayed in red and white.

Tool manufacturing

Delivering quality products and flexible solutions to our customers – regardless of size, precision requirements and scope – requires a certain amount of ingenuity. This is why we are always investing in new technology and machines to be able to live up to our own requirements and create the optimal solutions for customers, giving us a greater range of solutions, making us stronger professionally and creating a culture that our employees can be proud of.

Maintenance

Maintenance is an absolute necessity in order to ensure flexibility, a good end product and reduce the risk of both accidents and downtime in production. This is why our service department is always ready to help, no matter what service is required: repair, maintenance, adjustment, updating or changes of tools – regardless of whether we have manufactured the tool ourselves or the customer has delivered it. The service department is always prepared, keeping lead times for even urgent repairs at a minimum.

We make your **business move**

We make the world's most boring products **But also the most essential**

Ammeraal Beltech Modular (formerly Uni-Chains) is one of the world's leading manufacturers of plastic modular belts and chains for internal transport. We are a trusted supplier to many different industries around the world – from airports to bakeries and from the automotive industry to fish factories. Almost all industries use conveyor belts and we are, in all modesty, among the best in the world at making them.

INNOVATIVE SOLUTIONS

The vast majority of industries are constantly evolving. Productions and processes are streamlined, constantly requiring innovative solutions. In collaboration with our customers and leading research institutions, Ammeraal Beltech Modular has developed new transport concepts that are adapted to our customers' specific needs.

YOUR FUTURE AT AMMERAAL BELTECH

At Ammeraal Beltech Modular, you will work in an international environment, surrounded by the industry's most talented colleagues. Our employees are experts in their fields – as well as our most valuable resource. They are committed, passionate about their work and deliver re-

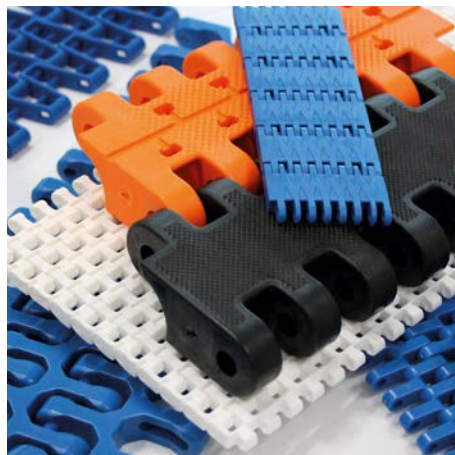

markable results. In return, we are committed to them, their well-being, professional growth and career development. We emphasize good teamwork and help develop, support and educate our employees.

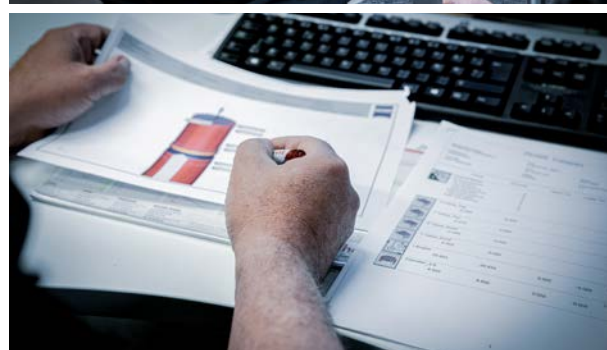

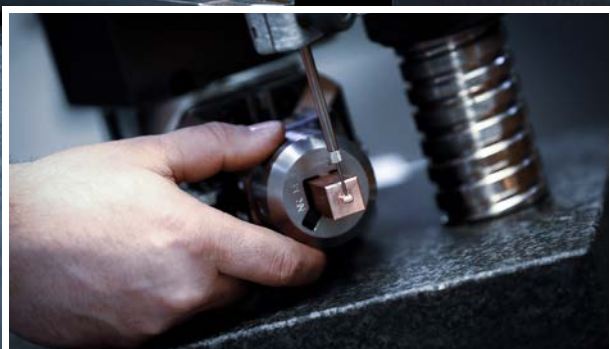

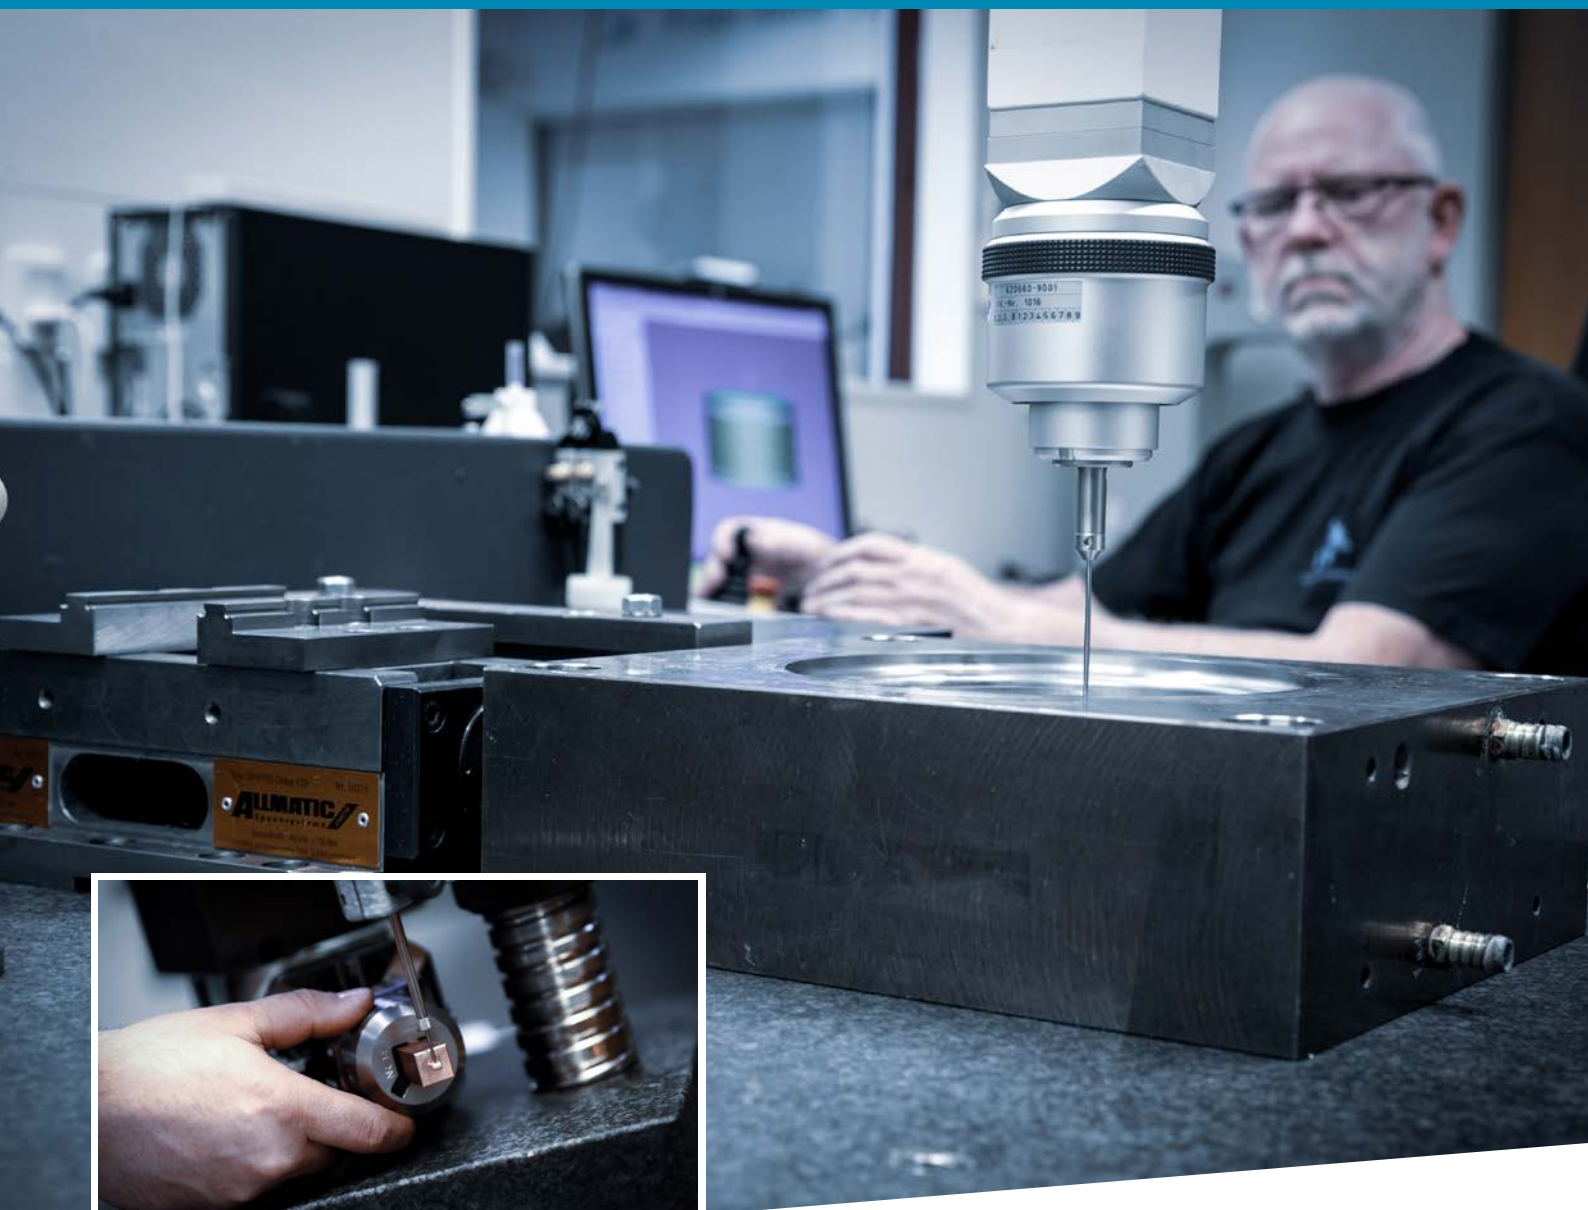

INTERNATIONAL CAREER OPPORTUNITIES

As an employee of Ammeraal Beltech Modular, you will have ample opportunity to work abroad. Ammeraal Beltech Modular is part of the international group AMMEGA, and we periodically post employees in the USA, Asia and Europe. A work stay abroad offers great experiences and valuable knowledge, both on a professional and personal level.

"I have worked at Ammeraal Beltech Modular for 22 years. I started working in the warehouse and subsequently I was hired in customer service, where I am the manager today. The best thing about working here is that you have the opportunity to develop and learn new things."

Lene Jørgensen
Customer Service Manager

Quality control and measurement service

Precise item measurement ensures quality and is crucial in production. When working with tasks that are technically demanding and have very narrow tolerances, it is important to control processes and post-process measurements to guarantee the right quality.

Uni-Technology A/S offers precision measurement and detailed reporting services to everyone. We perform both optical, tactile measurements and item measurement.
